Whitney Webb and Mark Goodwin | Stablecoins, CBDCs & AI Surveillance

https://www.youtube.com/watch/JOfcy5Y_PmA

0:00 - Intro

2:38 - Exposition on Farmington and Fluent Finance

9:08 - Stablecoins

17:39 - Transitioning to CBDC

31:52 - Crisis as pretense for surveillance and war

50:20 - Digital ID

1:00:23 - Powell's not your pal

1:03:59 - Figuring out the de facto CBDC

1:10:02 - Manufactured consent psyops

1:15:07 - National figureheads

1:25:17 - Social media warzone

1:33:26 - Preventing Bitcoin co-opting

1:45:35 - They'll profile and surveil everyone

1:55:27 - Fighting AI-controlled life

2:21:59 - Building alternatives

2:31:12 - Wrapping up

00:00:05.000 Su freaks it's your boy Marty here to
00:00:06.440 introduce us rip a
00:00:07.960 tftc thank you for joining us give this
00:00:10.360 video a like subscribe to the channel if
00:00:13.440 you catch us on podcast apps make sure
00:00:16.199 you subscribe there give us a rating a
00:00:18.199 review go to tftc doio as well become a
00:00:21.920 member of the site join the conversation
00:00:24.400 Truth for the commenter trying to get
00:00:25.880 you the high signal content in a world
00:00:29.000 gone mad this rip was brought to you by
00:00:31.359 good friends at River river is here to
00:00:33.360 make it as easy as possible for you to
00:00:35.719 buy Bitcoin and then take it into self-
00:00:37.680 custody go to river.com tftc set up an
00:00:41.239 account today uh you'll get \$5 of
00:00:44.079 Bitcoin after you buy \$100 worth of
00:00:46.559 bitcoin on River you can dollar cost
00:00:50.199 average in a Bitcoin with no fees uh if
00:00:53.120 you're just buying one off River has the
00:00:55.359 best fees in the industry uh they back
00:00:58.920 all their Bitcoin Reserves one to one in
00:01:01.120 multisig Cold Storage uh they highly
00:01:03.760 recommend that you take self- custody
00:01:05.479 they just introduced limits so if you
00:01:08.080 want to set a limit order uh below or
00:01:10.119 above the current bitcoin price River
00:01:12.200 makes that extremely easy as well they
00:01:15.040 also have real customer support you can
00:01:17.960 pick up the phone and call them if you
00:01:19.680 have any questions about your experience
00:01:22.000 on River so go to river.com tftc setup
00:01:24.640 an account today this rip is also
00:01:26.799 brought to you by our good friends at
00:01:28.000 Crow Health crowd health is here to
00:01:29.439 provide you with a new way to pay for
00:01:31.040 your health care it's not health
00:01:32.399 insurance health insurance is
00:01:33.720 notoriously expensive opaque impersonal
00:01:36.840 crowd health is really trying to change
00:01:38.439 that
00:01:39.119 model you pay a monthly fee it builds up
00:01:41.680 an account if you ever have a health
00:01:43.560 event you let crowd Health know they go
00:01:45.520 to the doctor they negotiate the price
00:01:47.320 lower you pay the first \$500 and the
00:01:49.840 rest gets crowdfunded by the crowd

00:01:51.920 Health
00:01:52.960 Community they have Bitcoin lightning
00:01:55.159 payments that they just enabled so if
00:01:56.680 you want to pay your monthly fee plus
00:01:58.240 your doctor in Bitcoin over the
00:02:00.079 lightning Network you can now do that uh
00:02:02.479 they've got a roster of doctors that you
00:02:04.719 can access uh they're approaching
00:02:06.759 healthc care in the right way it's a
00:02:08.520 healthy Community focused on
00:02:09.959 preventative health care uh and avoiding
00:02:13.480 the big Pharma industry as much as
00:02:15.440 possible so if you're looking for a
00:02:17.120 cheap health care solution you're not
00:02:19.000 happy with your health insurance maybe
00:02:21.080 it's a bit too expensive try out crowd
00:02:23.239 Health me my family use it go to join
00:02:25.239 crowd
00:02:26.040 health.com tftc sign up today use that
00:02:30.239 you'll get \$50 off your first month join
00:02:33.480 Crow health.com tftc enjoy this
00:02:37.959 R Mark Whitney it's great to have
00:02:41.879 you hey Marty great to be here as always
00:02:45.400 we're in that what's up Marty what's up
00:02:47.319 Whitney happy to be here we're we're in
00:02:49.519 that period between Christmas and New
00:02:50.840 Year's
00:02:51.879 where I'm terribly exhausted we have two
00:02:55.599 young kids around Christmas me too dude
00:02:58.319 it's all good well we exhausted together
00:03:00.959 talking about uh you know Banks up to no
00:03:05.640 good as they tend to
00:03:07.959 be I mean that's a good jumping off
00:03:10.080 point you guys just wrote an incredible
00:03:12.319 article expanding on something we ago
00:03:15.920 Whitney which was the
00:03:18.040 Farmington uh FTX
00:03:20.360 deal uh they change the name to Moon
00:03:23.120 bank or something like that Moonstone
00:03:25.799 Moonstone uh you left the end of that
00:03:28.760 piece that conversation
00:03:30.760 alluding to this weird company fluent
00:03:33.000 and you and Mark just co-wrote a piece
00:03:35.319 that really ties back Farmington and
00:03:37.799 Moonstone and paints the picture of the
00:03:44.319 technical architecture of what could
00:03:47.000 eventually become the cbdcs and it
00:03:48.760 revolves around stable coins which Mark

00:03:51.280 I know you've been on a pretty big
00:03:53.280 Vendetta on Twitter against
00:03:58.000 St yeah definitely I mean I I just think
00:04:01.000 that there's a there's a huge push to
00:04:03.040 sort of you know to to dollarize the
00:04:05.720 world right I mean that's what we've
00:04:07.200 learned from the dollar system over all
00:04:09.560 these years especially you know post
00:04:11.439 gold standard you know window shutting
00:04:13.680 it's like you know how do we how do we
00:04:15.360 get increase the velocity of the dollar
00:04:17.199 and increase the reach of it as much as
00:04:18.880 possible and now we have this Tech that
00:04:21.759 uh you know does that better than ever
00:04:24.199 um and uh we're seeing you know we're
00:04:26.600 about to see trillions of dollars go
00:04:28.440 into the stable coin you know uh
00:04:30.759 ecosystem for sure when you begin to
00:04:33.039 kind of pick at it and look at the
00:04:34.360 Players you know you see spook Banks
00:04:36.800 like uh like Farmington and Moonstone
00:04:39.360 and you know obviously a huge part of
00:04:41.919 the FTX debacle was stable coin related
00:04:45.240 so yeah gets very fun there's a lot of
00:04:47.560 fun things to talk about with stable
00:04:48.840 coins for sure yeah and I guess the
00:04:51.520 start I mean I don't know the piece open
00:04:54.680 right in front of me but I think going
00:04:56.759 back to Farmington Moonstone and how
00:04:59.120 fluence involved is probably a good
00:05:02.880 jumping off point to basally connect the
00:05:05.360 dots from the last
00:05:08.440 time yeah so um you know Farmington came
00:05:12.039 under the control of you know basically
00:05:13.919 the Deltech crowd like John chalopin
00:05:16.240 who's chairman of chairman of Deltech uh
00:05:19.039 Deltech being a major bank for FTX and
00:05:21.039 also tether right and so he along with
00:05:24.160 people like Noah Pearlman who I also
00:05:25.880 wrote about recently who's now the chief
00:05:27.720 compliance officer at binance was
00:05:29.759 previously COO of uh
00:05:32.160 Gemini um was with him or or is like on
00:05:35.520 the board of the vehicle that was used
00:05:37.199 to purchase and bring this tiny Bank
00:05:39.960 under control so for people that like
00:05:42.360 may not remember why it seemed sus that
00:05:45.240 like this group wanted to take over this

00:05:47.160 particular Bank they're like super small
00:05:49.080 it's like a broom closet sized one
00:05:51.639 branch Bank in the middle of nowhere in
00:05:54.360 like rural Washington state that like
00:05:56.120 for like over a hundred years had just
00:05:58.960 been like this local bank for like local
00:06:01.919 local Agriculture and like ranching and
00:06:04.120 stuff uh and had like never really had
00:06:06.560 any more than like 10 million dollars in
00:06:08.280 deposits and then shallow Pine takes it
00:06:10.759 over and um their deposits like within a
00:06:14.280 year swell from like 10 million to like
00:06:16.479 84 million and I think roughly like 71
00:06:20.280 or 7 I think 71 million of that was just
00:06:23.080 four accounts and 50 million was from
00:06:26.039 one account directly related to S
00:06:28.280 bankman freed that was called FTX
00:06:30.280 digital markets um and at the same time
00:06:33.720 they they made this transition in the
00:06:35.360 name right from Farmington to Moonstone
00:06:38.240 and tried to make it like this big you
00:06:39.800 know crypto uh focused Bank um is when
00:06:44.120 Alam research poured in like 11.5
00:06:47.199 million so you have Deltech Alam and UHF
00:06:52.960 basically like putting the bulk of money
00:06:55.039 and having the bulk of control over this
00:06:57.599 really tiny bank that uh gets fed
00:07:00.560 approval or approval to be part of the
00:07:02.520 Federal Reserve System when it like
00:07:04.120 totally should not have uh and uh the
00:07:07.479 FED still won't comment on the approval
00:07:09.360 process even though they issued an
00:07:11.440 enforcement action to force Farmington
00:07:13.680 after the FTX Scandal to like shut down
00:07:16.800 uh saying they violated the terms about
00:07:19.080 their like related to their approval but
00:07:21.280 won't explain what those term was or
00:07:23.479 like how they approve them or anything
00:07:25.160 still um so basically the FED in my
00:07:28.280 opinion is like cover up why they
00:07:30.759 approved them and it's not just the fed
00:07:33.319 that's like a betting that cover up it's
00:07:35.120 also like part of the Washington state
00:07:37.479 government that's like involved with
00:07:39.120 oversight of you know the finance
00:07:41.560 Financial Services industry in that
00:07:44.000 state and moon Moonstone like around the
00:07:46.199 same time they were you know becoming

00:07:47.840 Moonstone I guess had also hired like
00:07:49.800 one of the top guys for enforcement
00:07:51.800 actions like in Washington state from
00:07:54.919 the public sector side so they were
00:07:57.280 getting like very ready to be very
00:07:59.919 active I guess you could say um so
00:08:03.400 obviously a lot of stuff going on there
00:08:05.000 and then FTX unravels and and all of
00:08:07.919 that and a lot of scrutiny comes on this
00:08:09.319 bank that it shouldn't have been
00:08:10.319 approved it had all these deposits um
00:08:13.159 and weird stuff was going on there
00:08:14.960 basically so I guess that's a recap of
00:08:17.520 what Farmington was uh but right before
00:08:20.639 essentially like I think a few weeks
00:08:22.639 before the whole FTX thing fell apart um
00:08:25.520 Farmington teamed up with fluent finance
00:08:28.560 and fluent is this company that is
00:08:30.879 essentially based around the stable coin
00:08:32.799 and stable coin protocol us plus it's a
00:08:35.919 dollar pig St stable coin and up until
00:08:39.320 this point uh SBF FTX and Del well
00:08:43.120 Deltech still is you know all involved
00:08:45.040 with tether so why are they moving away
00:08:46.959 from you know dollar Peg staple coin
00:08:49.800 tether to this other dollar Peg staple
00:08:51.959 coin us plus and getting involved with
00:08:54.839 these guys and I think um you know one
00:08:57.600 major goal of this particular AR itical
00:08:59.560 was to answer that question so I guess
00:09:02.440 I'll pause there and see where you want
00:09:04.920 to take the combo from here
00:09:08.079 I I guess I'm wondering like what would
00:09:11.760 have happened if FTX didn't fail like
00:09:14.240 would you have been able to write this
00:09:15.399 article do you think uh yeah probably
00:09:18.120 because uh Sam bankman freed would have
00:09:20.160 been like yeah FTX has a stable coin and
00:09:22.440 it's called us
00:09:25.240 plus yeah right before like a couple
00:09:28.680 days before the collapse I think it was
00:09:30.160 like the 27th of October um Sam did a an
00:09:34.440 interview where he talked about how you
00:09:36.240 know they're working on a stable coin
00:09:38.040 and you know they're looking for the
00:09:39.200 right partner to do it and there's
00:09:40.959 pretty much no reason for them not to
00:09:42.200 have they're going to announce soon

00:09:45.320 something about a partnership with a
00:09:47.360 stable coin issuer or something and this
00:09:49.320 is like a three day or like four day
00:09:51.800 difference from when uh Farmington
00:09:54.440 Moonstone uh announced their partnership
00:09:56.800 with fluent Finance yeah I mean St I
00:10:00.160 mean stable coins generally it's been
00:10:02.000 fascinating obviously have tether which
00:10:03.519 is the monster in the room and they've
00:10:05.839 been around for quite some time that's
00:10:08.240 what I'm trying to figure out like
00:10:10.160 because the cbdc narrative has been out
00:10:11.640 there for years stable coins been
00:10:14.160 proliferating for years and do you think
00:10:17.560 this was always the intention to back
00:10:19.399 door in the cbdcs Via stable coins or do
00:10:21.720 you think the government and these like
00:10:24.519 fluent and R3 saw the success that
00:10:28.200 tether was happening realize like oh
00:10:29.920 this is the route we should go just
00:10:31.399 dollariz I think always I think always
00:10:33.640 the the the way I mean you look at the
00:10:35.839 way the the government in general has
00:10:37.800 kind of blurred the lines with the
00:10:39.160 private and public sector you know uh
00:10:42.160 they reserve a lot more rights to
00:10:43.920 restrict you know customer you know
00:10:46.000 access Blacklist things you know if if
00:10:48.000 they kind of operate with a with a
00:10:50.200 private sector company you know I don't
00:10:52.399 think the government actually wants to
00:10:53.959 directly issue a cbdc um there's a lot
00:10:57.160 of uh you know pain granular points that
00:11:00.079 they have to deal with for doing that
00:11:01.440 they don't want to have retail accounts
00:11:03.240 you know that they're directly
00:11:04.320 responsible for they want people to buy
00:11:06.519 treasuries and keep this you know mic
00:11:09.680 Ponzi scheme you know going um and so
00:11:13.600 yeah I think I think that this was kind
00:11:15.200 of always the plan and I think now that
00:11:17.279 we're starting to you know we're a
00:11:18.440 little bit more zoomed out a year away
00:11:20.160 from the FTX collapse I think that you
00:11:23.000 know you could kind of look at the FTX
00:11:25.680 collapse as sort of the pillage before
00:11:27.760 the foundation of the Digital Federal
00:11:29.959 Reserve and now you're seeing bance

00:11:33.120 getting completely taken over by
00:11:34.839 Regulators we have tether onboarding the
00:11:37.320 CIA and the FBI uh they're blacklisting
00:11:40.839 addresses at the behest of the you know
00:11:43.920 the American government uh and they're
00:11:46.240 like the biggest net buyers of
00:11:47.639 treasuries of the US government uh you
00:11:50.600 know they're like top 20 country you
00:11:53.240 know I think they're like 19th if they
00:11:54.680 were a country of of owners of of t-
00:11:57.120 bills um I I don't think any of that is
00:11:59.839 an accident personally uh I definitely
00:12:02.800 think it's on purpose it's funny with
00:12:04.720 tether particularly I mean Matt and I
00:12:07.560 have been talking about this some rabbit
00:12:08.560 all recap for five years now tether
00:12:11.639 bitfinex somewhat
00:12:14.680 been characterized as pirates of the
00:12:16.959 industry like operating in this
00:12:19.000 regulatory Gray Zone for many years
00:12:21.800 allowing people to evade the long arm of
00:12:25.160 the US government and send US dollar
00:12:28.199 stable coin to each other with kyc AML
00:12:32.000 and now particularly with the onboarding
00:12:34.360 of the Secret Service the FBI CIA and
00:12:38.079 the massive blacklisting that they've
00:12:39.880 done over the last few months it's like
00:12:41.240 oh [__] was this just a massive Honeypot
00:12:44.120 that's been building for for years like
00:12:46.079 do the tether truthers actually have it
00:12:47.519 all wrong like I think the tether the
00:12:50.399 tether truther thing is like the
00:12:52.000 greatest sop ever because it really
00:12:53.800 removes people it's like the issue
00:12:56.120 probably with tether which I think you
00:12:58.480 know kind kind of is is talked about in
00:13:00.399 this article very much is that tether is
00:13:02.519 like a narrow Bank you know it's this
00:13:04.320 kind of one to one they hold the
00:13:05.880 treasuries for all the dollars that they
00:13:08.320 create they actually hold one to one and
00:13:11.560 the problem is with that is you can't do
00:13:13.959 fractional Reserve banking in the in the
00:13:16.120 tether model so we have to create rather
00:13:18.199 than just using t- bills that are held
00:13:20.800 by canor Fitzgerald you know this
00:13:23.040 incredibly spooky uh you know we can get
00:13:26.040 into that later um you know they need to

00:13:28.360 create synthetic you know deposit
00:13:31.360 security token that then they can re
00:13:34.079 hypothecate and and basically recreate
00:13:36.839 this fractional Reserve banking system
00:13:38.880 that uh you know these these folks have
00:13:41.320 enjoyed for you know years and years and
00:13:44.480 years you know the reason Jamie Diamond
00:13:46.880 was like with Elizabeth Warren was like
00:13:48.600 we should ban all crypto if I was the
00:13:50.639 government I would do that that's
00:13:51.839 because the commercial Banks like JP
00:13:53.759 Morgan want to be the the entities
00:13:56.279 issuing the dollar pick staple coins or
00:13:58.440 the what whatever stable coins or
00:14:00.000 deposit tokens they want to take you
00:14:02.240 know the tether crowd and Pao and all of
00:14:05.120 those guys that they want to do it they
00:14:07.240 don't want these other companies to do
00:14:09.199 it yeah which makes complete sense I
00:14:11.800 mean yeah and these same you know a bank
00:14:15.279 issued stable coin is still just as
00:14:17.399 surveill and programmable as like a
00:14:19.560 hypothetical cbdc would be but this one
00:14:22.839 toone Reserve thing is a big problem for
00:14:24.920 them because the banks hold I mean they
00:14:27.279 want to keep their casino going they
00:14:28.880 need fractional Reserve stuff uh to
00:14:31.600 follow their existing models business
00:14:33.880 model they have no intention of changing
00:14:35.720 that and it's you know when you keep in
00:14:37.320 mind too that like in the in the states
00:14:39.519 specifically the central bank is owned
00:14:41.920 by the Wall Street Banks like they're
00:14:44.399 going to direct obviously what the
00:14:46.360 Central Bank policy will be with respect
00:14:48.440 to digital dollars right so you know
00:14:51.600 there's a reason why I think the FED has
00:14:53.279 been so like unwilling to be like yeah
00:14:56.519 we're going to do a cbdc they've been
00:14:58.079 very like you know we don't know we're
00:15:00.360 not looking at it you know and there's
00:15:02.120 people that have taken that as a sign
00:15:03.600 that like the FED is fighting against
00:15:06.079 cbdcs right um but not so not
00:15:10.440 so it's just one that's issued by you
00:15:13.800 know the people that we definitely know
00:15:17.160 steal from I mean it's just a different
00:15:18.920 group of Thieves in charge of like

00:15:20.440 programming and surveilling uh but they
00:15:23.079 you know are obviously going to
00:15:24.880 collaborate with the same with the
00:15:26.480 government it's going to be a public
00:15:27.920 private partnership
00:15:29.680 essentially and I mean fed now I mean
00:15:31.639 there might be an actual direct issue
00:15:33.399 cbdc but that'll probably be for like
00:15:35.120 inter bank settlement or something like
00:15:37.560 that it's not gonna be public interacts
00:15:40.160 with totally and that's exactly what fed
00:15:42.440 now is it's really just a it's a
00:15:44.880 Securities uh clearing system uh it
00:15:48.639 allows them basically to set the rate of
00:15:51.040 you know securitized overnight you know
00:15:53.639 funding that the Sofer um and and
00:15:57.240 basically allows the the the FED further
00:15:59.759 you know ability to you know survey you
00:16:03.000 know Securities trading between Federal
00:16:05.199 Reserve partner Banks it just gives them
00:16:07.279 more control but but of course it isn't
00:16:09.360 an actual product you know there's no
00:16:11.079 token there's no there's no retail
00:16:13.279 accounts it's it's literally just like a
00:16:15.120 communication system between Banks um
00:16:18.199 and yeah and then we're seeing of course
00:16:20.120 you know if you actually look at the the
00:16:22.000 pilot programs that the the the FED has
00:16:25.600 actually done um with some of the
00:16:27.440 Regional Federal Reserve Banks you know
00:16:29.079 the two main ones that get referenced
00:16:31.160 are project Cedar and project Hamilton
00:16:34.120 and project Hamilton is the retail
00:16:36.120 facing you know how many transactions
00:16:38.480 per second kind of the throughput of
00:16:40.079 what would be kind of the retail um you
00:16:42.759 know facing one and that was through um
00:16:45.360 the Boston fed with MIT and then there's
00:16:49.199 um Cedar which is actually like a
00:16:51.600 securitized token deposit and that's
00:16:53.880 kind of the the other side and th those
00:16:55.639 are really the two sides of you know the
00:16:57.959 dollar system system right there's the
00:16:59.720 Securities and the T bills behind it and
00:17:01.639 then there's the actual dollars created
00:17:03.800 in your checking accounts that are done
00:17:06.079 by the private sector you know that's
00:17:07.640 done private Capital creators um you

00:17:10.240 know that is increasingly moving towards
00:17:13.079 you know the JP Morgan uh of the world
00:17:16.599 and literally JP Morgan right so I think
00:17:18.720 we're that that that whole system this
00:17:20.640 whole racket is exceptionally profitable
00:17:23.480 uh for these people and you know just
00:17:25.119 because there's new tech coming out uh
00:17:27.400 you know they don't want to lose racket
00:17:29.080 so how do we how do we capture that
00:17:31.640 within the system we already have and
00:17:33.840 and the way that you do that is by
00:17:35.600 creating synthetic deposit
00:17:37.960 tokens well that brings up a good segue
00:17:41.440 because it seems like because if we look
00:17:43.280 at it the monetary system right now the
00:17:45.960 financial system right now one can make
00:17:47.720 a strong argument that cbdcs are
00:17:49.280 essentially already here these entities
00:17:51.160 have the ability to censor and
00:17:54.280 deplatform demonetize people at will but
00:17:57.320 it seems like they would be able B to do
00:17:58.760 it much more easily if they were to
00:18:02.200 adopt new tech and so I guess this is a
00:18:05.559 good point to basically
00:18:08.120 describe the like you mentioned Mark
00:18:10.600 they're Paving the way for this new tech
00:18:12.919 they're getting SPF out of the way
00:18:14.960 getting uh CZ out of the way probably
00:18:17.720 trying to muscle out poo and tether as
00:18:20.280 well and what is a technical
00:18:22.720 architecture of the tokenized dollar
00:18:26.480 system that they're building look like
00:18:28.760 and then like you mentioned the security
00:18:30.120 system looks like they're also trying to
00:18:31.320 replace the
00:18:32.840 dtcc um right now as
00:18:35.799 well yeah or maybe not replace it and
00:18:38.320 just kind of uh like transmute it into
00:18:41.520 you know I mean literally the the dtcc
00:18:44.200 you know uh you know working with R3 I
00:18:46.799 mean they they settle the Lion Share of
00:18:49.919 um you know of security settlement in in
00:18:52.760 the United States um which is obviously
00:18:55.320 the Lion Share of all security
00:18:57.039 settlement in the world
00:18:58.960 um and so yeah we're going to see uh you
00:19:02.720 know some digital version of of these t-
00:19:05.159 bills um that that decrease the

00:19:08.440 settlement failure rate um which
00:19:10.720 obviously you know it happens you know
00:19:12.240 there's a lot of settlement failure in
00:19:14.000 the treasury market and it's really
00:19:15.919 interesting when you go and look back at
00:19:18.400 points in history where the the major
00:19:21.320 spikes of settlement failure rates in
00:19:24.360 the United States the main ones are the
00:19:27.320 most obvious one are September 2001
00:19:31.320 which was
00:19:32.200 911 interestingly Kor Fitzgerald who
00:19:35.200 owns the tether T bills were in you know
00:19:38.559 their office was in 911 and all of it
00:19:41.000 was you know destroyed and uh they
00:19:43.799 passed some emergency measures that day
00:19:45.720 to uh settle some treasuries that
00:19:48.520 wouldn't have been settled um and you
00:19:51.000 can you can get kind of into a rabbit
00:19:52.480 hole there but and then of course uh you
00:19:54.480 know September 2019 uh there was the
00:19:57.240 huge explosion in the the repo Market uh
00:19:59.799 right before uh you know uh what
00:20:02.960 happened in 2020 I kind of yeah covid uh
00:20:05.960 government lockdowns uh and you know
00:20:08.159 trillions and trillions of dollars of
00:20:09.520 stimulus printing right um I don't think
00:20:12.120 that's a coincidence personally nether
00:20:14.880 do I I fell down the caner fit show
00:20:16.919 Rabbit Hole after their CEO was on CNBC
00:20:20.320 talking about
00:20:22.080 um tether in crypto and Bitcoin and
00:20:26.640 there was a documentary about the
00:20:28.559 families of the C Fitzgerald employees
00:20:31.240 that were lost on 911 and he was a
00:20:33.440 complete scumbag in the
00:20:36.480 aftermath yeah well there was definitely
00:20:38.640 a media effort to rehabilitate him after
00:20:41.280 that uh he was also Epstein's neighbor
00:20:44.600 fun fact really and yeah and that house
00:20:49.880 used to be owned by Epstein and Wexner
00:20:52.080 and all of those guys oh lovely just you
00:20:56.039 know it's I mean Whitney we've been
00:20:58.200 doing this for years making a cheery
00:20:59.679 neighborhood Bill Cosby's there too you
00:21:02.200 know just we've been doing this for
00:21:04.919 years and every every episode we record
00:21:07.559 I become more astonished at how small
00:21:09.080 the circle is and how interconnect it is

00:21:10.799 over decad yeah it's pretty small and
00:21:13.640 there's I mean more people you're
00:21:15.279 mentioning Pearlman others are involved
00:21:18.320 in this stable coin
00:21:23.320 cbdc yeah the canor stuff and the tether
00:21:26.039 stuff is really interesting too where if
00:21:27.520 you look at you know Max Kaiser holds
00:21:29.600 this patent for uh virtual security
00:21:32.360 trading right that he filed uh in the
00:21:35.279 late '90s that was the backbone the
00:21:38.159 patent that they used for this Hollywood
00:21:39.799 Stock Exchange um which was a simulated
00:21:43.600 digital Securities trading
00:21:46.640 platform uh that referenced in the
00:21:49.799 initial patent referenced the canor
00:21:52.080 Fitzgerald patent from a few months
00:21:54.039 before a few years later canor
00:21:56.919 Fitzgerald buys out Kaiser from the
00:21:59.440 board of the Hollywood stock exchange
00:22:02.080 takes all of that throws it into the
00:22:04.760 office uh you know a couple months
00:22:06.799 before September 11th um and then of
00:22:10.120 course it all blows up in the uh events
00:22:14.039 of that day um and of course you know we
00:22:17.679 see Heavy involvement with tether and
00:22:19.760 caner fritzgerald and you know it's it's
00:22:22.279 a it's a very interesting uh you know
00:22:24.720 because now we're getting to this point
00:22:26.039 where it's very clear that the next play
00:22:28.440 is virtual security settlement and
00:22:31.039 trading um and that you know yes the
00:22:33.919 dollar is the reserve currency of the
00:22:35.840 world but really the reserve asset of
00:22:37.840 the world is us treasuries and that's
00:22:40.159 really the for me you know I wrote this
00:22:42.640 book the Bitcoin dollar that's kind of
00:22:44.480 proposes like hey let's not even really
00:22:46.960 worry about the dollar right now I don't
00:22:48.799 even know if Bitcoin can replace the
00:22:50.799 dollar but what it can replace is the US
00:22:53.720 treasuries it can replace treasuries as
00:22:55.840 a reserve asset for a new Financial
00:22:57.640 system
00:22:58.559 if we do it right and if we do it well
00:23:00.720 but if we kind of allow this
00:23:02.240 dollarization and these kind of stable
00:23:04.520 coin Spooks to sort of come in and
00:23:07.440 encourage bitcoiners to support

00:23:09.840 companies uh that buy up treasuries and
00:23:12.320 mass um you know we're seeing tether
00:23:14.559 reintegration and strike you know we're
00:23:16.400 seeing a lot of uh people that are very
00:23:19.520 uh cozy to to stable coins into tether
00:23:22.720 and and they're you know these huge net
00:23:24.840 buyers of treasuries when actually
00:23:26.760 Bitcoin kind of is
00:23:28.799 you know poised potentially to really
00:23:31.720 disrupt this Reserve asset system um I
00:23:35.200 just think it's something bitcoiners
00:23:36.279 should be really aware of um as we move
00:23:39.279 forward and what what kind of practices
00:23:42.080 in systems and architecture that we uh
00:23:44.600 you know
00:23:46.320 promote yeah I completely agree it's
00:23:50.919 um you have to imagine they're thinking
00:23:54.679 of Sly roundabout ways to undermine the
00:23:58.159 end goal of Bitcoin which is to replace
00:24:00.320 that
00:24:02.640 system
00:24:04.240 integr at the hip together and so I
00:24:07.960 guess yeah well I mean I think it's
00:24:09.919 naive to think that they wouldn't do
00:24:11.880 that I mean if something if you if a
00:24:14.600 tool is created to stick it right to
00:24:18.120 Commercial and central banks and like
00:24:20.200 prevent malfeasance on their part if
00:24:23.600 they can co-opt it to become part of
00:24:27.200 their system and part of their
00:24:28.880 malfeasance and enable their malfeasance
00:24:31.279 they will definitely do that it's not
00:24:33.880 like they're going to be like oh well
00:24:35.640 you invented Bitcoin you got us you know
00:24:38.799 that's not how these guys all right we
00:24:41.240 give up you guys won yeah and arguably
00:24:44.320 you know and I think this is something I
00:24:45.679 get into in the book as well is like you
00:24:47.520 know I think the dollar system probably
00:24:49.320 needs Bitcoin more than like Bitcoin
00:24:52.360 needs the dollar system right I mean
00:24:54.159 it's the dollar system has now passed 33
00:24:56.880 trillion like we're at this runaway uh
00:24:59.640 you know Debt Service where you know the
00:25:01.760 amount of money the US owes just to pay
00:25:04.039 its debt is now surpassed the the you
00:25:06.640 know the the GDP growth in a year you
00:25:09.320 know we're a zombie company you know you

00:25:11.600 would take us out back and old yell us
00:25:13.640 if you know you were if we were a dog
00:25:15.840 it's like this like hor you know we're
00:25:17.840 just we're not there's no way to fix
00:25:19.799 this without massive massive money
00:25:22.640 Printing and stimulus to to service this
00:25:24.760 debt there's just no other way we can't
00:25:26.320 increase tax receipts enough to to to
00:25:29.559 service this debt um so what do you do
00:25:32.080 you print a bunch to pay for it well now
00:25:34.200 we have this sort of demand
00:25:36.559 inelastic uh you know disinflationary
00:25:39.080 Supply cap system that can actually suck
00:25:42.760 up all of this excess liquidity that
00:25:45.039 comes from money Printing and then what
00:25:47.039 do we see you know now that we're seeing
00:25:48.799 ETF start to go we're starting to see
00:25:51.120 Bitcoin start to increase again and now
00:25:53.000 we have the regulatory MO is like
00:25:55.279 finished being built um we're seeing
00:25:58.080 basil 3 requirements coming in that are
00:26:00.039 forcing financial institutions to hold
00:26:02.200 equal parts dollar to bitcoin or dollar
00:26:04.399 to Gold so if we start to see these you
00:26:07.039 know in actuality kind of
00:26:08.679 hyperinflationary events in the dollar
00:26:10.799 system uh we have sort of no Pond
00:26:13.480 intended you know tethered uh the dollar
00:26:16.679 to to bitcoin price appreciation uh from
00:26:20.159 a financial regulatory
00:26:23.080 standpoint yeah no when you I keep
00:26:26.200 saying yeah after everything I say I got
00:26:27.679 stop that uh the uh something I'm
00:26:31.039 conscious of but like the timing of all
00:26:33.679 this whether it's the over the last year
00:26:37.520 getting SBF out of the way getting CZ
00:26:39.279 out of the way completely cucking tether
00:26:42.120 then in parallel you have the treasury
00:26:45.640 coming out writing that letter Jamie
00:26:48.159 Diamond the rest of the executives on
00:26:49.799 Capitol Hill Elizabeth Warring dropping
00:26:52.360 this bill then we have the ETF which
00:26:54.840 seems to be uh approaching imminent
00:26:58.039 approval maybe in the next couple weeks
00:27:00.919 it it does seem very coordinated to me
00:27:04.399 and then I think there's AI oh sorry go
00:27:07.080 ahead well I was just going to say I
00:27:08.919 think there's a even more stuff to be

00:27:10.919 cognizant of like remember the doj holds
00:27:13.159 an insane amount of Bitcoin and that's
00:27:15.000 probably only going to increase so like
00:27:17.279 with binance a ton of doj people have
00:27:20.000 access not just to every uh transaction
00:27:22.880 on that exchange from now going forward
00:27:25.760 but also everything in the past what
00:27:27.320 happened happens if they flag past
00:27:29.039 transactions and retroactively start
00:27:31.679 seizing wallets right um they could do
00:27:35.559 that and um I think uh with a lot of
00:27:39.360 this stuff that has I've you know been
00:27:41.200 warning about for a long time but we've
00:27:42.720 seen it escalate a lot since October 7th
00:27:45.200 this claim that Bitcoin specifically is
00:27:48.120 being used to finance terrorism and
00:27:50.840 you're having these these
00:27:52.919 pushes uh you know to regulate based on
00:27:56.159 that like under a national security
00:27:58.440 justification I think that's a recipe
00:28:00.559 for like even more doj like seizures
00:28:04.519 specifically of Bitcoin and so you know
00:28:07.240 why is the doj so interested in accum or
00:28:09.720 you know it's a major armor of the US
00:28:11.720 government so like the US government
00:28:13.200 were broadly interested in accumulating
00:28:16.000 so much Bitcoin and holding on to it and
00:28:19.080 also um basically creating like National
00:28:22.600 Security justifications to literally
00:28:24.320 take anyone's Bitcoin they could
00:28:26.360 possibly want under a variety of like
00:28:28.679 insanely vague me metrics like you know
00:28:31.720 like I've talked about before the doj is
00:28:33.240 part of this this we organization uh
00:28:36.279 that wants to label people who are
00:28:38.360 accused of publishing
00:28:41.159 misinformation online as cyber criminals
00:28:44.440 and cyber terrorism who should have
00:28:46.120 their domains and assets seized yeah I
00:28:48.679 know I mean obviously that's like
00:28:49.919 everybody
00:28:51.000 here the doj could eventually like you
00:28:53.519 know it's a it's a really broad net but
00:28:56.159 why are they setting that system some up
00:28:58.480 you know what I mean and I think it's
00:29:00.279 important to keep in mind too that you
00:29:02.559 know like Gary ginzler of the SEC has
00:29:04.720 made it clear very consistently for a

00:29:06.519 while now uh that Bitcoin is the only
00:29:09.880 digital currency viewed from the sec's
00:29:12.519 perspective as a commodity everything
00:29:14.559 else is a security to Gary guinsler so
00:29:17.880 they're going to you know that's a
00:29:19.559 pretty unique status they want to treat
00:29:21.200 it as a commodity as they move
00:29:22.679 everything into the digital currency
00:29:24.240 space and they have plans to do that and
00:29:26.320 use it for their benefit and to think
00:29:29.080 they wouldn't do that is like I I think
00:29:31.640 personally really naive I mean of course
00:29:34.120 they would get your the US holds the
00:29:36.760 Lion Share for sure of Bitcoin from a
00:29:39.519 retail standpoint and from yeah as you
00:29:41.720 said a seizure standpoint and I think
00:29:43.880 again you know just an interesting way
00:29:45.440 to get this you know you reference Marty
00:29:47.720 the circle being so small it's like
00:29:49.720 bitfinex that huge hack you know years
00:29:52.200 ago the has all that coin you know and
00:29:55.640 the SEC has them by the balls because
00:29:57.760 they did that Leo token to pay back
00:30:00.760 everybody that got their Bitcoin hacked
00:30:02.960 which obviously was a security obviously
00:30:05.880 how much see and if you go to like the
00:30:08.399 bitfix hackers like the rapper couple
00:30:10.720 right whatever it's like what rason yeah
00:30:14.279 she was actually a regular at my bar
00:30:16.320 that I used to work at a bar in uh in
00:30:18.200 the Bay Area and I like knew her as a as
00:30:21.720 a as a regular when the whole thing
00:30:23.000 happened I was like this is the biggest
00:30:24.640 [__] SC up I've ever seen there's no
00:30:26.679 way these people did this there's no way
00:30:28.679 they held it in a Google Drive account
00:30:31.200 there's no [__] way any this is
00:30:33.720 anyway that's speculation but how much
00:30:36.080 did the doj get the original hack was
00:30:38.679 like 116,000 Bitcoin I believe I they
00:30:41.840 got
00:30:43.360 ,000 yeah it was like 92 I think it was
00:30:45.760 just below 100 yeah something like that
00:30:47.799 I could be wrong but I think that's
00:30:49.039 right no it has because historically
00:30:51.000 when they sees the Silk Road coins uh
00:30:53.919 and coins from
00:30:55.960 other uh hacks or whatever or legal

00:30:59.760 operations that they took down they've
00:31:01.159 auctioned them off but they haven't done
00:31:02.519 that with the bit fix wins which they've
00:31:04.240 been sitting on for I think over a year
00:31:07.120 now um yeah and they haven't signal that
00:31:09.760 they're going to auction
00:31:11.480 them yet do you think
00:31:14.639 they're talking about this circle again
00:31:17.399 it's like well who does who who do they
00:31:19.399 sell them through they sell them through
00:31:21.000 coinbase coinbase has gotten in trouble
00:31:23.600 from the SEC for securi things been
00:31:25.360 asked on list stuff they are also the
00:31:26.840 cust lan of the cash create spot ETF for
00:31:30.120 Black Rock for you know for everybody
00:31:31.919 right so there's just this like you know
00:31:34.600 mutually assured destruct you know that
00:31:36.679 Meme of everybody in the church holding
00:31:38.360 the guns against you know it's like that
00:31:40.200 is the situation we're in of the Bitcoin
00:31:43.200 space right now it's like fall in line
00:31:45.639 or we blow this whole thing up you know
00:31:47.720 it's it's very very interesting yeah so
00:31:51.679 I said yeah again God damn it as it
00:31:53.440 pertains to this transition to the
00:31:57.320 Commercial Bank controlled
00:32:00.279 stablecoin quasi cbdc where are they in
00:32:04.480 terms of their road map and how quickly
00:32:07.080 do you think they can get to Market with
00:32:09.880 it that's a pretty good question well I
00:32:12.399 mean so
00:32:13.440 basically I you know in this article it
00:32:15.960 focuses on this particular Network that
00:32:18.080 fluent Finance which was partnered with
00:32:20.559 you know this SPF Deltech thing um
00:32:23.519 they're sort of in this network with
00:32:25.039 like the xdc network um and R3 right and
00:32:29.960 R3 is developing cbdcs all over the
00:32:33.279 world but they also have like a more
00:32:35.840 like they're casting a wider net than
00:32:38.080 just cbdcs they have this thing called
00:32:39.840 the digital currency accelerator and
00:32:42.240 they're basically focusing on not just
00:32:44.320 cbdcs but you know deposit tokens and
00:32:46.799 stable coins so like any entity Banks
00:32:50.519 central banks whatever can like sandbox
00:32:53.799 and like test out uh their digital
00:32:56.399 currency and and you know ad

00:32:58.320 programmability and all the stuff that
00:33:00.559 like you know people are concerned about
00:33:01.960 when it comes to cbdc's as it relates to
00:33:03.919 impacts on individual freedoms
00:33:05.559 specifically Financial freedoms right so
00:33:08.320 they're like they've created all these
00:33:10.480 tools to ex you know make it happen
00:33:13.240 really fast the the question is I think
00:33:15.720 at the end of the day like trust and
00:33:17.200 adoption and so you know what I've sort
00:33:19.799 of brought up um on some recent
00:33:21.919 interviews um is is this you know stuff
00:33:24.440 I've been writing about since 2021 how
00:33:27.120 the biggest banks in the world and the
00:33:28.399 biggest Central Bank some of the most
00:33:29.840 important central banks in the world um
00:33:32.559 in this we partnership in the Carnegie
00:33:35.639 endowment which at the time was run by
00:33:37.639 the current CIA director uh we basically
00:33:40.360 gaming out Financial cyber or cyber
00:33:43.240 attacks on the financial system and a
00:33:45.639 lot of people don't know this but the
00:33:46.960 entire Financial Services industry in
00:33:48.919 the US so like all of the big banks have
00:33:50.799 an ISAC which is an information
00:33:53.080 information sharing and Analysis Center
00:33:55.320 where they their ciso all get together
00:33:58.720 like privately and like game out threats
00:34:03.240 to the system and how to respond to them
00:34:05.519 so like all the Wall Street banks have a
00:34:08.079 have had since 2021 like a unified plan
00:34:11.119 about what they'll do if there's a big
00:34:13.199 Cyber attack on the banks and so if
00:34:15.639 you're like you know the biggest bank
00:34:18.520 these same banks that caed 2008 and you
00:34:21.239 know that there another banking crisis
00:34:23.320 and like economic Calamity is inevitable
00:34:27.960 and you don't want to be blamed by
00:34:30.520 people when they're angry about their
00:34:32.440 money not really having value anymore
00:34:35.079 you know how do you get around that you
00:34:37.359 know I don't think they want a repeat of
00:34:39.000 Occupy Wall Street I think that's pretty
00:34:40.639 clear right so how do you you know get
00:34:43.760 around that well you're like oh well
00:34:45.918 these faceless hackers took over the
00:34:47.918 financial system and we have to relaunch
00:34:50.480 it um with these things because it's

00:34:53.280 more secure and you know we'll know who
00:34:56.199 everybody is is you know because there's
00:34:59.560 this parallel push to End online
00:35:01.240 anonymity and financial privacy going on
00:35:04.480 here uh which is part of this whole like
00:35:06.359 narrative too about like Bitcoin and you
00:35:08.560 know financing Terror transactions and
00:35:10.839 stuff like it's all about like kyc and
00:35:13.920 like linking your digital ID and
00:35:15.960 government issued ID to you know every
00:35:18.640 transaction and having even the smallest
00:35:20.440 transaction \$1 50 you know is surveil by
00:35:25.200 the the banks and the government right
00:35:28.720 so people aren't just going to be like
00:35:30.800 yeah let's do that system if they launch
00:35:32.400 it without some sort of event that
00:35:34.240 causes you know fear and panic so I
00:35:36.640 think it's likely it'll get rolled into
00:35:38.040 some sort of like cyber Patriot Act
00:35:40.240 after some sort of mass cyber event that
00:35:43.079 the banks have all gained out and the we
00:35:45.119 which runs this partnership the banks
00:35:46.839 and all these intelligence agencies are
00:35:49.520 a part of say is is going to happen
00:35:51.240 before January
00:35:53.400 2025 they said that so the
00:35:57.359 whether you want to call predictive
00:35:58.480 programming or pacing and leading the
00:36:00.960 public I mean you had Anthony blinkin
00:36:03.960 believe on Capitol Hill saying I think
00:36:06.079 Lindsey Graham asked them like how big
00:36:08.000 is a threat right now are you seeing
00:36:09.680 blinking
00:36:10.800 lights blinking lights everywhere we
00:36:13.040 turned it was Christopher Ray head of
00:36:14.800 the
00:36:15.680 FBI lindsay Graham was like so is there
00:36:18.040 going to be another 9911 Chris
00:36:21.000 everywhere I turn the answer is yeah I
00:36:22.920 mean it's basically what that was and I
00:36:25.000 mean they do this all the time like
00:36:26.760 before January 6 this top lady at DHS
00:36:30.079 basically was like we can see another
00:36:31.720 911 building and we can't stop it and
00:36:33.680 it's going to be Trump supporter
00:36:35.520 insurrectionist and all this stuff and
00:36:38.079 then you know immediately January 6
00:36:40.240 happens and all these like CIA former

00:36:42.400 CIA veterans that had just been elected
00:36:44.160 to congress mostly on the Democrat
00:36:45.960 ticket uh were all on like cable news
00:36:48.400 being like this is America's second 91
00:36:51.319 just like all on the same immediately
00:36:54.920 dude yeah
00:36:58.119 well they have they have kind of two
00:36:59.880 like sort of modes levers right they
00:37:03.280 have this fear based which obviously
00:37:05.359 they simulate fear and you know that's
00:37:07.359 the whole 911 into Patriot Act into all
00:37:09.760 that stuff and then they have the other
00:37:11.000 side right which is like this
00:37:12.319 convenience thing that they build which
00:37:14.560 you know you look at what they've done
00:37:15.920 and in this private public you know
00:37:18.240 sector blur obviously you know Whitney
00:37:19.560 you've written a lot about you know the
00:37:20.800 Dara project LIF log being Facebook you
00:37:23.200 know and then we look at kind of what
00:37:25.240 they did with [__] Mo and it's like
00:37:27.800 they created this public social media
00:37:30.680 Network for like paying each other and
00:37:32.880 making you know it's like if I if I look
00:37:34.800 at a venmo I can see people that I was
00:37:37.240 friends with like in high school or
00:37:39.119 whatever that are sending you know
00:37:40.880 paying their bills and stuff and I can
00:37:42.240 see how much they're paying I mean it's
00:37:43.599 total Madness and they're doing that as
00:37:45.839 this like sort of this form of
00:37:47.119 convenience and you look at venmo right
00:37:50.040 exactly you're looking at venmo
00:37:52.400 integrating uh you know they're all
00:37:54.280 they're in part of the PayPal Mafia you
00:37:56.720 know group The Suite of project products
00:37:59.000 and now they're integrating um I did an
00:38:01.599 interview with Walter Hesser of the head
00:38:03.680 of strategy of paxos asking him about
00:38:05.760 the PayPal USD uh and he very
00:38:08.359 specifically said that you know I don't
00:38:10.560 think the usdt and usdc model from a
00:38:13.720 regulatory standpoint is going to last
00:38:16.760 um but what I do see somehow also is
00:38:20.839 trillions and trillions of dollars of
00:38:22.440 stable coins coming into the market so
00:38:24.760 he's he's basically signal that you know
00:38:27.680 through this PayPal venmo you know

00:38:31.079 convenience stick you know or the carrot
00:38:33.800 not the stick uh you know they're
00:38:35.720 they're going to you know basically take
00:38:37.599 over uh the the stable coin Market from
00:38:41.240 these other entities um and and and wrap
00:38:44.079 it back into the the PayPal stripe teal
00:38:48.240 verse um you know cabal basically be
00:38:53.079 just to elaborate on that really quick
00:38:54.960 so what what Markman I guess when he
00:38:57.359 brought up like lifelog and and Facebook
00:39:00.440 so like lifelog and these other programs
00:39:02.680 which also brought us paler another
00:39:05.119 Peter teal PayPal Mafia company um they
00:39:08.920 tried to make this insane panopticon
00:39:10.960 program after 911 called total
00:39:12.760 information awareness look up the logo
00:39:14.560 it's very illuminating um and basically
00:39:18.119 the goal they put like an Iran Contra
00:39:20.560 criminal in charge of it who was
00:39:22.200 obsessed with like Mass surveillance for
00:39:23.960 the purpose of pre- crime and arresting
00:39:25.960 people like potentially threatening the
00:39:29.560 existing status quo of the government
00:39:31.640 and like protesting war non-violently
00:39:33.800 and stuff um in charge of this DARPA
00:39:36.319 public private partnership uh called
00:39:38.800 total information awareness that was
00:39:40.079 going to suck up everyone's data and
00:39:42.400 predictively uh you know just enable a
00:39:44.680 pre- crime type of surveillance drag net
00:39:47.800 very unconstitutional stuff and I think
00:39:50.640 the the the National Security State
00:39:52.400 realized then because there was a huge
00:39:54.200 uproar about it that people were not
00:39:56.920 willing to accept that if the government
00:39:58.920 was overtly involved but they would if
00:40:01.280 it appeared at least as a purely private
00:40:04.400 sector Venture yeah so the same I think
00:40:08.079 is true for cbdcs they've seen this push
00:40:10.960 back of people don't want cbdcs no to
00:40:14.319 Central Bank control they don't want the
00:40:15.960 government issuing the cbdc and the
00:40:18.480 government programming and surveilling
00:40:20.400 the money so I think they're going to do
00:40:22.319 what they did with total information
00:40:23.920 awareness and you private
00:40:27.880 entities like you know JP Morgan the
00:40:30.880 same banks that everyone you know most

00:40:33.040 people use now uh and have them be the
00:40:36.440 issuers of the de facto cbdc or rather
00:40:40.319 the synthetic cbdc is the term that gets
00:40:42.760 thr around some as well and CBD uh
00:40:45.960 synthetic cbdcs you know as defined by
00:40:48.119 the people that use that term is
00:40:49.359 something like a stable coin with a
00:40:51.319 Twist which means that the reserves are
00:40:53.880 backed up by the fed or backed up with
00:40:56.000 the Fed
00:40:57.200 bad that's one thing people really need
00:40:59.880 to begin to internalize is this whole
00:41:03.960 demarcation between public and private
00:41:06.160 is a complete Mirage the yes the the
00:41:10.599 private sector via lobbying dollars and
00:41:13.119 control the fed the fed the money is the
00:41:16.000 most important tool on the planet the
00:41:18.680 FED is a private entity owned by the
00:41:20.359 commercial Banks yeah essentially hold
00:41:23.520 the economy by extension the government
00:41:26.400 by the balls there is no real
00:41:29.640 demarcation particularly at this point
00:41:31.839 yeah and it's going to get even worse
00:41:34.280 the terms of like the blending of these
00:41:36.720 of these groups because um that same
00:41:39.200 Carnegie
00:41:40.200 endowment thing that I mentioned with
00:41:42.160 like all the big US US Banks the FED uh
00:41:45.640 the ECB the bank of England and like
00:41:48.240 tech companies and stuff uh their
00:41:51.359 solution to Cyber attack problems or a
00:41:54.839 coming cyber pandemic was to basically
00:41:57.760 merge Banks banking regulators and
00:41:59.960 intelligence
00:42:03.040 agencies and if you just look at
00:42:07.000 the number of things that are happening
00:42:09.119 in parallel like we're hyper focused on
00:42:11.760 the financial system and the monetary
00:42:13.359 system right now and you mentioned the
00:42:14.960 digital ID for sending receiving
00:42:18.079 transactions that'll be tracked
00:42:20.200 granularly they're doing the same thing
00:42:21.599 on social media just pure information as
00:42:24.520 well where they're really trying to Silo
00:42:27.119 people into these
00:42:28.760 censored platforms they're trying to
00:42:31.640 pass laws around hate speech and what's
00:42:33.599 happening in UK in Ireland right now

00:42:36.520 yeah and and they're they're pairing
00:42:38.440 that with like gutting encryption too
00:42:40.119 specifically in the UK yep and gutting
00:42:42.720 open source software and the EU EU
00:42:45.800 setting the stage to ban open source
00:42:47.680 software because it's too
00:42:49.359 dangerous D dangerous yeah I mean expect
00:42:53.359 a lot of these terms to be thrown out I
00:42:55.160 mean uh you know if and when this big
00:42:58.359 Cyber attack that they're predictively
00:43:00.119 programming happens the enemy is going
00:43:02.200 to be privacy they're going to be like
00:43:04.319 we can't have privacy anymore that's
00:43:06.240 what they're going to say I I guarantee
00:43:08.079 that because that's the only way they
00:43:10.119 can you know basically Force adoption of
00:43:12.839 all this stuff they want to do which is
00:43:15.240 cbc's digital ID is they want everything
00:43:18.520 you do online to be completely surveil
00:43:20.400 and that includes Financial transactions
00:43:22.200 like specifically Financial transactions
00:43:24.040 and so people for a long time have
00:43:25.640 rightly point out that digital IDs and
00:43:27.119 cbdcs are like you know they go together
00:43:30.040 right you you get you get both it's not
00:43:32.599 just like one or the other like it's a
00:43:34.720 very like integrated thing um and you
00:43:38.760 know this is all also tied up with this
00:43:41.280 goal to have the driver's license for
00:43:43.079 the internet that you have to have you
00:43:44.640 know your digital ID or government
00:43:46.240 issued ID tied to everything you do
00:43:48.960 online um and whatever happens with this
00:43:52.400 thing they're going to blame whoever
00:43:54.440 they want really because we know with
00:43:55.720 like Wiki leaks Vault 7 right the the
00:43:57.920 CIA through the Umbridge program can put
00:44:00.079 like the Fingerprints of literally any
00:44:01.640 nation state or person they want in any
00:44:04.680 Cyber attack and blame them it was
00:44:06.559 Russian
00:44:07.440 Bots yeah or they can you know like
00:44:09.720 they've been doing recently not actually
00:44:11.839 have any evidence but then get a
00:44:13.440 mainstream media highing that says Iran
00:44:15.800 hacked this China hacked this I mean it
00:44:18.040 doesn't really matter like it's all just
00:44:19.839 fake you know and a lot of those

00:44:21.440 companies attributing blame like
00:44:22.839 recorded future for example has a recent
00:44:25.559 one that's surfacing they were created
00:44:27.559 by the CIA in you
00:44:29.400 tell you know so like you really want to
00:44:32.599 trust these guys saying like we were
00:44:34.079 attacked by this nation trust like the
00:44:35.960 intelligence front
00:44:37.440 company that wants to push all of this
00:44:40.000 through because the CIA director was in
00:44:41.640 charge of this like whole thing that
00:44:43.559 mapped out how to like bring down the
00:44:46.079 banks and launch all of this [__] I mean
00:44:48.280 it's just it's mental it seems like say
00:44:51.680 about it it seems like they're setting
00:44:53.160 up Iran to be the scapegoat here with
00:44:55.160 what's going on well sure uh I mean you
00:44:58.800 know there's there's a big Israel
00:45:00.319 component here so like that we
00:45:01.640 partnership against cyber crime I
00:45:02.960 mentioned is led by a career Israeli uh
00:45:05.599 intelligence guy named T Goldstein um
00:45:08.640 and then you have this uh stuff that
00:45:10.000 I've reported on recently uh well a
00:45:12.640 couple years ago but it's become
00:45:13.880 recently relevant like the CTI League um
00:45:16.680 which has a a big relationship with like
00:45:18.559 you know a key part of the US's DHS as
00:45:22.280 it relates to critical infrastructure
00:45:24.000 and like cyber attacks and stuff um and
00:45:26.800 and the guy that created CTI League uh
00:45:29.160 Ohad zidenberg has been his whole career
00:45:31.680 blaming Iran for stuff with little to no
00:45:33.640 evidence uh for cyber attacks and uh is
00:45:37.119 still pretty much an in active Israeli
00:45:39.280 intelligence asset and Israeli
00:45:41.119 intelligence uh for the past like 20
00:45:44.119 years has had like a documented admitted
00:45:47.160 policy of trying to get the US uh to D
00:45:51.559 use as many resources as possible to
00:45:54.040 further regime change in Iran including
00:45:56.319 the US uh striking Iran first so Israel
00:45:59.280 doesn't have to and you even have former
00:46:00.880 mad directors like May Dean literally
00:46:03.599 saying that and also saying that mad has
00:46:06.640 like unlimited funds and powers to make
00:46:09.640 that happen and have a five front
00:46:11.559 strategy for regime change in Iran that

00:46:13.440 includes like going the US and striking
00:46:15.480 Iran first and when you factor in stuff
00:46:17.760 like Israel and the USS Liberty where
00:46:19.960 Israel tried to get us involved in one
00:46:22.319 of their Regional Wars uh by blowing up
00:46:26.040 a US ship and killing uh you know us uh
00:46:30.280 you know Naval personnel and then
00:46:33.119 blaming it on Egypt to try false flagged
00:46:35.960 us hard to try and get us involved in
00:46:38.599 their war and now they're about to have
00:46:40.359 a regional War
00:46:42.119 again yeah I mean they're about I mean
00:46:44.480 they've openly said like in the past
00:46:46.000 couple of days it's going to go beyond
00:46:47.760 Gaza and they're going to declare war on
00:46:49.440 Hezbollah now which is Lebanon did you
00:46:52.160 see right did you see so two things
00:46:55.960 happened this week Iran and Iraq I think
00:46:59.599 engaged in a deal to explore oil
00:47:02.280 reserves together and like an joint
00:47:04.800 venture produce revenue for their
00:47:07.240 countries and then this week Biden
00:47:10.960 announced tactical uh hits on strategic
00:47:15.319 areas in Iraq um just somewhat out of
00:47:18.760 nowhere it's going to escalate I mean
00:47:20.400 it's obviously was I in my opinion just
00:47:22.880 like planned from the off to escalate to
00:47:25.040 a regional War because every effort to
00:47:27.160 deescalate has intentionally been
00:47:28.920 scuttled by the US and
00:47:31.520 Israel right not unlike what happened in
00:47:34.040 Ukraine and like how Boris Johnson when
00:47:35.839 he was in charge of the UK scuttled like
00:47:39.520 they could that war could have ended
00:47:41.000 like very early on and he scuttled it on
00:47:42.839 purpose you know there's like an
00:47:45.280 intentionality here to keep this going
00:47:47.520 and to expand it and people need to keep
00:47:49.240 in mind too that Iran is now part of
00:47:51.079 bricks and that includes like not you
00:47:54.960 know in to an extent some form of like
00:47:57.920 military Alliance you know so there's a
00:48:00.599 potential to like bring in China and
00:48:02.359 Russia to all of this and you have all
00:48:03.839 this stuff going on in the Pacific
00:48:05.160 Theater as well I mean I don't want to
00:48:06.839 get too like into geopolitics right now
00:48:09.520 because I also haven't been following it

00:48:10.880 like super closely it's the holidays and
00:48:12.760 that stuff like develops really uh you
00:48:15.119 know rapidly right but there's
00:48:17.359 definitely it's going to go Regional and
00:48:20.680 and Israel will not want to be fighting
00:48:22.640 that alone and so to get the US to
00:48:26.800 specifically the US public to consent at
00:48:29.599 least a significant faction of the US
00:48:32.920 public to consent the people in the US
00:48:35.119 need to feel like they're under attack
00:48:36.839 also and there's been this like framing
00:48:38.920 too of like oh the border is so porous
00:48:41.440 and in the US Mexico border and
00:48:44.000 Netanyahu saying like uh you know Hamas
00:48:47.040 sleeper cells could come to the US and
00:48:50.000 all the [__] you know that's that's
00:48:52.400 pretty wild and then they and then the
00:48:54.000 IDF put out this or maybe an Israeli
00:48:56.480 Embassy put out like this video of Hamas
00:48:59.280 like blowing up a a Christmas parade in
00:49:03.200 in South Korea and like all this stuff
00:49:07.319 yeah the story border patrol what's
00:49:09.559 going on guys finding IEDs at the border
00:49:12.640 and which that that's like that's where
00:49:15.520 it's like so blatant in your face it's
00:49:17.079 like they're letting yeah t of thousands
00:49:19.400 of people coming in day now and then
00:49:21.319 they're also like there could be sleeper
00:49:22.599 cells it's like why don't you just close
00:49:23.960 the border are you trying to
00:49:26.079 but they're it's an intentional thing
00:49:28.160 you know this is something that that
00:49:29.200 really gets me sometimes is because like
00:49:30.960 people look at stuff like the Border
00:49:32.440 policy right now and they're like oh
00:49:33.920 it's just incompetence because look we
00:49:35.559 have the scile guy who's President well
00:49:38.280 yes but no one you know who actually is
00:49:41.599 serious thinks Biden makes any decisions
00:49:44.880 he's just a figurehead arguably like US
00:49:47.359 presidents have been for decades yeah so
00:49:50.359 like there's people that want I mean he
00:49:52.720 doesn't run DHS there's like non scile
00:49:55.319 people people in charge of DHS for
00:49:56.960 example right I mean it's not all like
00:49:59.760 oh cile Biden he's scile thus all US
00:50:03.200 policy decisions or lack thereof are
00:50:06.920 because of you know him being scile

00:50:09.359 that's just that's not how it works it's
00:50:10.920 like a very deliberate thing and a lot
00:50:12.920 of times things that are deliberate are
00:50:14.559 written off as like incompetence or
00:50:16.400 stupidity and um I don't think that's
00:50:19.000 the case
00:50:20.359 here no I think I can tie some of this
00:50:23.079 Regional stuff kind of back to the you
00:50:25.599 know this sort of dollar Bitcoin oil
00:50:28.720 stuff right where like if you look at if
00:50:31.559 you look at March 2020 when we had that
00:50:34.400 big covid implosion of stock market gold
00:50:38.520 oil Futures went negative um you know
00:50:42.000 that was a few weeks before the happening
00:50:46.359 which was the a very important happening
00:50:49.359 where uh issuance relative issuance
00:50:51.720 actually went you know to six and a
00:50:53.440 quarter Bitcoin a block which relative
00:50:55.680 to the total Supply was the first time
00:50:58.200 you know Bitcoin issuance was below 2%
00:51:01.000 which is the Rel you know the target
00:51:02.599 inflation rate of the US dollar the
00:51:04.440 target uh or like the you know the rate
00:51:07.359 of gold coming out of the ground is
00:51:08.880 around 2% and oil as well right so we
00:51:11.880 kind of saw the Petro dollar system
00:51:15.599 essentially go tits up that day uh and
00:51:20.160 now we're seeing it being replaced by
00:51:22.760 it's the exact same mechanism of an
00:51:26.079 energy commodity that through a monopoly
00:51:30.160 of the exchange of the in and out of the
00:51:32.559 energy commodity being in dollars which
00:51:34.880 is what we're seeing with Bitcoin you
00:51:36.720 know that's how they upheld the Petro
00:51:38.720 dollar system was this Monopoly on hey
00:51:41.559 you want to industrialize you want to
00:51:43.079 modernize your country you want to buy
00:51:44.640 oil you got to buy dollars first we can
00:51:46.680 shovel all of this inflationary effects
00:51:48.839 into Europe and into Asia and have all
00:51:51.359 these people buying t- bills and buying
00:51:53.599 cash to buy oil now we're seeing the
00:51:56.359 exact same thing uh set up with Bitcoin
00:51:59.839 um and now we're seeing a whole bunch of
00:52:01.760 you know our our regional policy has
00:52:03.839 really changed considerably you know I
00:52:05.880 mean we're all relatively the same age
00:52:08.200 right and you know our entire life has

00:52:10.480 been about being in the Middle East and
00:52:12.559 and mucking around in the oil fields
00:52:14.440 right and then all of a sudden we're out
00:52:16.240 of
00:52:17.040 Afghanistan uh we pull out and leave a
00:52:19.119 whole bunch of [__] there it becomes no
00:52:20.720 longer economically viable to continue
00:52:23.079 this like money laundering uh oil scheme
00:52:26.680 and then you know they go on and you
00:52:28.520 know obviously do what they were doing
00:52:29.760 in Ukraine which has a huge component of
00:52:32.200 money laundering via crypto which is
00:52:34.040 very interesting but we've established
00:52:36.079 basically you know the Bitcoin dollar uh
00:52:40.319 in lie of the Petro dollar system and if
00:52:43.000 the world wants access to this energy
00:52:45.520 commodity they need to buy dollars first
00:52:48.559 um and I think we're seeing that sort of
00:52:51.520 play out and in an extreme way right as
00:52:53.960 we're getting ready for another habing
00:52:56.359 where this where this issuance gets cut
00:52:58.079 in half again and we're going to see
00:52:59.760 that even be more extreme and now we're
00:53:01.960 setting up with regulatory action ETFs
00:53:05.400 like everything that has happened the
00:53:07.680 last four years between this happening
00:53:11.040 and and this next happening are uh
00:53:13.440 entirely by Design You could argue and I
00:53:16.480 think to the point of the digital ID
00:53:18.839 stuff to the point like you know the the
00:53:20.720 regulatory mode is built but maybe we
00:53:22.720 don't know all the components yet but
00:53:25.280 when they monetize Bitcoin to the rate
00:53:27.400 at which they want it to and it really
00:53:29.359 does get you know extremely high in US
00:53:32.400 dollar value uh you know there's going
00:53:34.640 to be so many more requirements in the
00:53:37.160 US for citizens to be able to use it um
00:53:40.119 exchanges are going to get more and more
00:53:41.599 and more kyc there's going to be hey
00:53:44.119 take a selfie and scan your face to be
00:53:46.280 able to you know sell on coinbase or
00:53:49.200 whatever you know we're kind of moving
00:53:50.480 towards that that world and I think you
00:53:52.640 know we obviously have to just be
00:53:54.440 exceptionally careful you know Bitcoin
00:53:56.559 has really entered the macro world in in
00:53:58.640 a very extreme way um and it's right

00:54:02.040 before I think we kick off an election
00:54:04.079 cycle right before we kick off probably
00:54:07.119 a debt Jubilee of sorts um if there is
00:54:10.119 another Cyber attack or another lockdown
00:54:12.119 or any of these things that we all
00:54:13.400 basically are just waiting for to happen
00:54:15.119 again uh you know there's going to be
00:54:16.799 massive stimulus and the next stimulus
00:54:18.520 is not going to be 5 trillion do 6
00:54:20.960 trillion do it's going to be 40 trillion
00:54:24.720 50 trillion you know we're going to see
00:54:26.799 really extreme stuff if I can add
00:54:29.599 something on the border really quick so
00:54:31.720 the whole mess on the border too in
00:54:33.760 terms of its intentionality so it's not
00:54:35.799 just happening in the US it's it's
00:54:37.520 happening Sim in similar ways in a lot
00:54:39.319 of other countries in my opinion this is
00:54:41.680 one of the main ways they're going to
00:54:42.920 shoo in digital ID we have to know who
00:54:46.119 everyone is because there's too many
00:54:47.359 migrants and we have to know who has
00:54:49.240 what rights and who can do what and so
00:54:51.799 we all need digital ID for everybody
00:54:54.400 that's biome metric and all of this
00:54:56.000 stuff and I'm sure they'll invent
00:54:57.319 something like oh there's fraud there's
00:54:58.880 fake IDs we have to have secure
00:55:01.920 interoperable IDs just like a designed
00:55:04.799 by ID 2020 and an sg16 and whatever yeah
00:55:09.119 so that's definitely going to be part of
00:55:10.520 it and then you have this whole added
00:55:11.920 thing of like something crazy is
00:55:13.920 obviously going to happen with the
00:55:14.960 economy next year whether it's provoked
00:55:18.319 by a Cyber attack or whatever the way
00:55:20.319 the UN UNICEF world food program has set
00:55:23.039 up all of their stuff for humanitarian
00:55:26.079 Aid is the world coin model which is
00:55:29.119 scan your eyeball and we give you a
00:55:32.119 digital ID and that tells us whether or
00:55:34.880 not you eat or
00:55:36.319 not you know if you want to get your
00:55:38.920 rations you have to go to the wherever
00:55:40.920 the rations are and have your eyeball
00:55:42.520 scanned and if there's a mistake in the
00:55:44.720 system and it decides you're not you no
00:55:47.480 food for you and this has happened in

00:55:49.319 India's digital ID system Adar to like a
00:55:51.839 significant degree and they haven't
00:55:53.440 fixed it and they don't do anything
00:55:54.760 about it and they Justified it by saying
00:55:56.960 that like people's data will be safer
00:55:59.000 and more secure it's the most easily
00:56:01.000 hackable thing in the world there was
00:56:02.799 like a a big big- time like Indian CEO
00:56:05.880 guy that was like I'm publicly gonna
00:56:08.119 like put up my ad horror ID number and
00:56:10.599 like look how safe it is and it was like
00:56:12.079 hacked in like 10 minutes and people
00:56:13.680 like trolled the crud out of him you
00:56:16.039 know I mean it's a joke um but they need
00:56:18.640 to manufactur consent for all of this
00:56:20.760 stuff and the way they're going to do
00:56:22.359 that is fear and panic there's obviously
00:56:23.880 going to be some sort of security crisis
00:56:26.119 they have to create to bring in that
00:56:28.319 fear and panic but they're creating the
00:56:30.200 base issues on purpose I mean it's an
00:56:33.160 intentional decision to have the Border
00:56:34.640 in that state and it's not just
00:56:36.160 happening in the US it's like a broader
00:56:37.799 thing just like digital ID is like a
00:56:40.440 global thing and you know talking about
00:56:42.880 the geopolitical stuff you know the
00:56:44.520 Divide here of you know bricks versus
00:56:48.680 the West specifically like us UK Israel
00:56:52.200 Europe the EU um they all agree on
00:56:55.440 digital ID so like yeah there's this
00:56:57.760 geopolitical tension stuff at one level
00:57:00.960 but go another level up they all agree
00:57:03.079 about some sort of surveill programmable
00:57:05.000 money maybe in the US it's synthetic dbd
00:57:07.640 cbdcs in China and the bricks countries
00:57:10.200 it's direct issue cbdc they all agree
00:57:13.359 about digital IDs that are biometric
00:57:15.760 they all agree on agenda 2030 in the
00:57:18.440 sustainable development goals yeah and
00:57:21.680 what's interesting about that well to
00:57:23.440 take it back to the article influent
00:57:25.039 Finance the United Arab Emirates what
00:57:26.880 are they setting up financially what is
00:57:29.400 fluent Finance after Farmington gets
00:57:32.599 shut down specifically doing in the
00:57:35.039 United Arab Emirates they're the
00:57:36.880 connective tissue between the cbdcs

00:57:39.480 direct issue cbdcs of bricks land and
00:57:42.240 the synthetic cbdcs of the West and the
00:57:44.480 deposit tokens that's what they're
00:57:46.480 setting up that's what fluent Finance is
00:57:48.240 doing in the U right now uh with R3
00:57:51.440 that's partnered with the dtcc for the
00:57:53.960 security stuff that Mark was talking
00:57:55.760 about earlier um and doing the Central
00:57:58.720 Bank digital currency for the UAE uh and
00:58:02.680 a host of other countries that are
00:58:04.119 interoperable with a lot of other ones
00:58:06.039 specifically being overseen by the bis
00:58:08.640 these mcbd projects for like multi CB
00:58:11.599 cdbc projects about interoperability uh
00:58:15.039 the goal is to have you know Corda the
00:58:17.000 R3 DLT right have that as much run on
00:58:21.119 that as possible but what doesn't run on
00:58:22.720 that will be interoperable with that so
00:58:24.760 interoperability is like a key thing to
00:58:27.079 watch out for and a lot of these
00:58:28.799 companies like like fluent Finance for
00:58:30.799 example are developing this stuff and
00:58:33.039 like no one has noticed which I I think
00:58:35.839 is kind of interesting like a lot of
00:58:37.599 people that are so focused on cbdcs and
00:58:39.839 they're a threat to human freedom and
00:58:41.160 all of this are just pointing the finger
00:58:43.160 at like bricks and not paying attention
00:58:45.119 to any of these other countries really
00:58:46.960 they're just like bis bad but like yeah
00:58:49.359 um you know Wall Street has plans for
00:58:52.079 this too and like they're not good
00:58:53.520 either like Jamie Diamond and Jerome pal
00:58:56.319 are not coming to the rescue guys
00:58:58.480 they're creating the same system under a
00:59:00.480 different name well
00:59:03.240 um Jamie Diamond programming my dollars
00:59:06.240 to expire and uh tying it to my carbon
00:59:10.319 credits or whatever is not any better
00:59:12.280 than Jerome Powell or uh I don't know
00:59:15.799 Janet Yellen doing it I mean it's all
00:59:18.119 the same garbage it's a red herring
00:59:21.039 really it's like we're going to get this
00:59:22.599 false victory of like oh man you know to
00:59:25.880 santis signed a bill that says you know
00:59:28.119 no CBD issuance in Florida like [__]
00:59:30.799 yeah but it's like but now we got
00:59:32.880 Bradley AI coming

00:59:35.119 in well that's I mean exactly it's when
00:59:39.039 you sent me the piece to read over
00:59:40.720 before you guys publish it I remember
00:59:42.079 message you Whitney I was like I thought
00:59:43.680 R3 had been shoveled into the Dustbin of
00:59:47.559 irrelevance and I think many bitcoiners
00:59:50.039 believe that because around 2015 2016
00:59:54.280 when I was in New York they had like a
00:59:55.559 big presence they had a big social media
00:59:57.039 presence they were publicly speaking on
00:59:59.240 CNBC if I recall correctly and really
01:00:01.680 making this push for distributed Ledger
01:00:03.440 technology for corporations and I
01:00:05.920 thought they just petered out and never
01:00:07.799 found product Market fit and faded away
01:00:10.240 but as your article proves they've been
01:00:13.160 very successful in creating these
01:00:16.359 Partnerships via their CA platform which
01:00:19.039 I thought was defun oh definitely
01:00:22.240 definitely yeah without out and you know
01:00:26.000 what I think is interesting too to take
01:00:27.359 this back to FTX too you know in light
01:00:29.760 of their team up with fluent finance and
01:00:31.559 what fluent Finance has gone on to do I
01:00:33.760 really am curious and I I don't really
01:00:36.359 know if there's any way to know now but
01:00:38.359 you know all those donations and cozying
01:00:40.359 up to like you know Elizabeth Warren and
01:00:43.079 all these other like lawmakers by FTX
01:00:45.920 Executives or Ryan Salam cozying up with
01:00:48.000 the Republicans and stuff like was this
01:00:51.200 to uh have them favor the stable coin
01:00:55.200 FTX was going to team up with which she
01:00:57.200 seems to have been fluent finances us
01:00:59.119 plus like to favor them as like you know
01:01:02.039 the stable coin issuer of choice for the
01:01:05.599 synthetic
01:01:06.839 cbdc pretty interesting uh possibility
01:01:10.599 there because a lot of it thought it was
01:01:11.920 just like oh crypto reg you know
01:01:13.760 regulation to favor uh you know FTX and
01:01:16.960 SP SPF and stuff but I think there's a
01:01:18.480 lot of bigger plays that have been going
01:01:19.799 on here for some time and I think people
01:01:21.640 ignoring these kind of actors we're
01:01:23.599 doing ourselves disservice if you look
01:01:25.480 at the people who created fluent Finance
01:01:27.760 the main guy Bradley Algood used to work

01:01:29.799 for like NATO and like Military
01:01:32.280 Intelligence stuff and then immediately
01:01:34.960 starts making special economic zones out
01:01:37.880 of a building on this Indian reservation
01:01:40.520 in South Carolina to like replace
01:01:42.960 Delaware as a place where like companies
01:01:45.920 register to like get tax advantages and
01:01:48.680 stuff and that I mean and then goes on
01:01:52.400 to team up with uh the sky Oliver Gail
01:01:55.400 who is a failed reggae artist uh who
01:01:59.039 claims to be the in inventor of
01:02:01.680 cbdcs and the other guy was with him in
01:02:05.119 that first cdbc project in
01:02:08.279 Barbados so the inventors of cdbc team
01:02:12.160 up with like NATO spook guy uh to create
01:02:15.640 the SBF stable coin that's what was
01:02:18.720 going on before FTX uh collapsed and so
01:02:22.240 yeah maybe SPF is like out of the
01:02:24.599 picture and whatever but this isn't
01:02:26.319 going away like fluent Finance okay yeah
01:02:28.760 we can't do the thing with Moonstone and
01:02:30.359 with chalpin and Deltech and FTX but we
01:02:32.920 can do it with R3 which was partnered
01:02:35.119 with you know fluent Finance like pretty
01:02:37.000 much from the very beginning because R3
01:02:39.640 started off as a Consortium of like some
01:02:41.559 of the biggest banks in the world and
01:02:42.960 their backers are still the biggest
01:02:44.279 banks in the world and there's a lot of
01:02:46.160 overlap between how fluent Finance
01:02:48.119 started in those same banks that back
01:02:50.200 our three specifically City Bank uh HSBC
01:02:54.119 and bar Clays which uh if you know the
01:02:57.039 history of any of those
01:02:58.760 Banks not good and then you have Bradley
01:03:02.039 all good this the fluent Finance guy
01:03:04.000 like publishing op-eds and and coin
01:03:05.839 Telegraph and stuff being like cbdcs
01:03:08.240 would be great if they put Wall Street
01:03:10.520 in
01:03:12.760 charge literally what it says I mean
01:03:15.240 it's just they're telling you but no
01:03:17.680 one's paying attention because they're
01:03:19.119 like oh well look these fed shars are
01:03:21.520 saying we're not going to do a digital
01:03:23.039 dollar and that means free freom wins in
01:03:25.279 the good old USA no what happens in the
01:03:28.520 USA is that uh Wall Street steals from

01:03:31.680 everyone and funnels the money to the
01:03:33.440 oligarch class and leaves everyone dirt
01:03:36.079 poor that's what they're going to
01:03:39.039 do it's not good please don't trust them
01:03:42.839 you know like I just don't know what to
01:03:44.599 say to people who are like Jamie
01:03:46.119 diamonds on our side anymore like in
01:03:48.359 Jerome po like they're not he's red
01:03:51.359 blooded I promise you they're not he's
01:03:53.839 got your best interest at heart but I me
01:03:56.520 trust the plan yeah
01:03:59.400 the many things to say here number one
01:04:01.880 Whitney thinking back to when Michael
01:04:03.799 creger and I were on your podcast like
01:04:05.720 this is why I'm extremely happy that you
01:04:07.039 guys wrote this piece particularly
01:04:08.279 hiding highlighting fluent in US plus is
01:04:11.960 I think whether it's tether or more
01:04:13.720 specifically usdc if you recall the
01:04:16.119 conversation that you Michael and I had
01:04:18.720 last year I was pretty convinced that
01:04:20.319 like usdc was going to be like the
01:04:23.839 private public partnership company of
01:04:26.599 choice but they they said that right
01:04:28.720 like who was it it was like Brian
01:04:29.880 Armstrong of coinbase was like usdc is
01:04:33.079 gonna
01:04:34.000 be of the
01:04:35.760 US exactly yeah oh right it seems like
01:04:40.000 whether it's R3 fluent the combination
01:04:42.400 of the two just working behind the
01:04:44.240 scenes like again I thought R3 was done
01:04:46.480 like I thought they just completely
01:04:48.359 missed their product Market fit and were
01:04:51.000 defunct and that's leading me to believe
01:04:53.000 that like the tether and us DCS of the
01:04:55.079 world which get all the the tick R three
01:04:57.880 this year won cbdc partner of the
01:05:01.720 year and from the Central Banking
01:05:04.400 magazine like they're all over the place
01:05:07.119 they're building this stuff and no one
01:05:08.599 is paying attention to them at all and
01:05:11.440 they're the big banks of the world so
01:05:13.480 you know people being like oh this is
01:05:15.279 all central banks and all Augustine
01:05:16.760 Carsons well like obviously they're
01:05:18.319 involved to a huge degree but don't
01:05:21.119 think wall Street's out there like just

01:05:23.359 going to let the is take away their like
01:05:25.599 fractional Reserve crack from them it's
01:05:28.359 it's not how this works you know yeah
01:05:31.200 but everything's based on framing right
01:05:33.000 and that's why again I'm extremely happy
01:05:34.559 you guys wrote this piece because I
01:05:36.240 think over the last few years
01:05:38.000 particularly like the mainstream media
01:05:40.160 and people covering stable coins and
01:05:42.160 cbdc has really tried to fit the frame
01:05:45.079 around usdc and tether and I don't think
01:05:49.440 most people were aware of us plus fluent
01:05:52.079 or the fact that R3 was not defun until
01:05:54.760 a couple of weeks well you know I think
01:05:57.240 tether's recent overtures oh sorry I
01:06:00.920 think tether's recent overtures to like
01:06:02.680 you know onboarding the Secret Service
01:06:04.200 and the FBI and all of this stuff
01:06:06.279 freezing all of these Wallets on behalf
01:06:07.960 of the US government this is them trying
01:06:10.039 to Curry favor so they don't get totally
01:06:12.000 nuked by regulations and they can be
01:06:13.920 like a de facto synthetic cbdc and I'm
01:06:17.160 sure usdc is looking to do the same you
01:06:19.760 know and that's why I I mentioned
01:06:21.480 earlier like what were these SPF
01:06:23.520 political donations potentially really
01:06:25.559 about to be like who you know the people
01:06:29.279 that develop the regulations and and
01:06:31.279 enforce them are going to be the king
01:06:32.640 makers of like which stable coins are
01:06:35.559 the de facto cbdc or
01:06:38.079 cbdcs right and uh you know I think
01:06:42.240 that's something to to look for here I
01:06:44.760 mean which one is it going to be I mean
01:06:46.760 like like um Mark brought up in talking
01:06:49.279 to the the paxos guy saying like he
01:06:51.200 didn't think like tether and usdc was
01:06:52.960 going to make it past regul
01:06:54.760 like obviously in my opinion that's what
01:06:57.119 SBF and chalow pine thought because you
01:07:00.039 know FTX Deltech very tied up with
01:07:03.680 tether for a very long time like very
01:07:07.720 connected so why are they moving from
01:07:10.440 one dollar Peg stable coin to another
01:07:13.279 well the big difference between tether
01:07:14.760 and US plus is that us plus like
01:07:17.839 overemphasizes regulation and cbdc

01:07:21.279 compatibility and trust and Reserve and
01:07:24.200 all of this stuff it's a trusted tether
01:07:27.039 it's a trustworthy tether right I mean I
01:07:30.920 wouldn't really say it's actually
01:07:32.200 trustworthy because it's working with
01:07:33.599 the same Shady people right so I mean uh
01:07:38.640 but but they want that public perception
01:07:40.160 to be there and obviously I think the
01:07:42.079 Gambit was to sell that to regulators
01:07:44.799 and be like look this city group backed
01:07:49.200 uh us plus stable coin and whatever uh
01:07:53.359 is compliant and compatible with cbdcs
01:07:56.720 it can be used for trade crossb Finance
01:07:59.480 all over the world and look R3 in the
01:08:02.200 UAE and they're going to be the bridge
01:08:04.119 between bricks and the Western countries
01:08:07.119 and all this stuff I mean I'm sure those
01:08:09.760 conversations have been had behind
01:08:11.319 closed doors you know and then one thing
01:08:13.680 I think we didn't mention really quick
01:08:15.119 on why it's going to the digital dollar
01:08:17.960 is going to be this and not like a
01:08:19.080 direct issue cbdc like if the if the Fed
01:08:21.960 was going to do a direct issue cbdc
01:08:24.040 they're really behind like that would
01:08:26.319 take them multiple years to roll out and
01:08:28.640 they need this stuff a lot sooner yeah
01:08:31.679 so as uh CIA Spooks literal CIA veterans
01:08:36.080 focused on this kind of stuff have said
01:08:38.399 in publication in from think tanks like
01:08:40.679 csis is like we have to use the digital
01:08:43.158 dollars that are already here we can't
01:08:45.920 make a
01:08:47.080 cbdc and what does that mean it means
01:08:49.198 like they're close to structural
01:08:50.839 insolvency and systemic collapse yeah
01:08:54.198 exactly exactly that because that's
01:08:56.839 what's worries me because we talk about
01:08:58.679 we were talking about like fear and
01:09:00.600 false Flags in the future and I maybe
01:09:04.080 I'm in a
01:09:05.679 bubble
01:09:07.399 and have some confirmation bias but it
01:09:10.439 does seem like the marginal return on
01:09:13.279 utility of these fear tactic tactics has
01:09:16.520 diminished like people are calling
01:09:18.080 [__] sure with inflation rates
01:09:21.719 pissed uh the Border situation people

01:09:23.960 are like what the hell is going on here
01:09:25.158 you have the mayor of New York being
01:09:26.359 like we got to stop this he never
01:09:27.880 thought you yeah
01:09:29.679 totally 2024 is going to be chaotic and
01:09:32.640 they've designed it to be chaotic I
01:09:34.560 think but I think in that chaos they
01:09:36.560 they're very likely to lose control and
01:09:38.279 I think they know it too like once they
01:09:40.080 inject whether intentionally or not
01:09:43.080 instability into all these
01:09:45.238 systems their hold on things becomes a
01:09:49.040 lot uh less strong than it arguably is
01:09:52.520 now because for one thing when things
01:09:54.238 get really unstable you're disrupting a
01:09:56.199 lot of the convenience comfort factor
01:09:58.080 that keeps people from like paying
01:09:59.520 attention or doing anything about how
01:10:01.239 things
01:10:02.159 are well that's what worries me the
01:10:05.040 return on marginal utility of these fear
01:10:06.719 tactics is falling like they're gon have
01:10:08.159 to create something so goddamn scary why
01:10:11.159 do you think there's this UFO [__] that
01:10:13.360 they keep like resurrecting and like all
01:10:15.280 these like crazy things that like happen
01:10:18.040 simultaneously they're going to throw
01:10:19.760 them all at us and see which one sticks
01:10:22.280 and their problem is like what s if none
01:10:24.239 of them stick which is what I hope for
01:10:27.320 um but I think people are like sced out
01:10:30.280 dude and also you have all this stuff
01:10:32.000 with like chat GPT and deep fakes like
01:10:34.040 no one knows what's real online anymore
01:10:36.120 either and like everything is just
01:10:38.199 really
01:10:39.679 fake yeah but that's why I think you
01:10:42.159 also see this big push of uh you know
01:10:45.840 the other side of the stable coin spook
01:10:48.520 uh angle which is like banking the
01:10:50.760 unbanked in this
01:10:52.280 altruistic uh you know like human rights
01:10:55.480 Foundation sort of angle that's like oh
01:10:58.320 look at how good tether is it's you know
01:11:00.600 it's being used and and people love it
01:11:02.960 and all this stuff and it's uh FBI loves
01:11:05.679 it too yeah exactly and you look at the
01:11:08.800 people that are sort of uh you know the

01:11:11.080 other side right there's the there's the
01:11:12.520 fear angle and then there's the like hey
01:11:14.480 let's let's kind of trick people into
01:11:16.040 building these infrastructures and
01:11:17.400 rooting for them and you look at that
01:11:19.239 you know there's almost no better
01:11:20.560 examples of the the public private
01:11:23.040 sector spook uh you know smashing then
01:11:26.360 like Jack dorsy with the Spy Shop that
01:11:28.560 he ran at Twitter for you know a decade
01:11:31.400 and and his integration with with
01:11:33.360 intelligence you know censoring stories
01:11:35.400 and then of course Peter teal uh with
01:11:37.840 palente tier and like Founders uh you
01:11:40.120 know his big fund right and both of them
01:11:42.000 are two of the biggest supporters of
01:11:44.280 lightning Labs Elizabeth Stark's outfit
01:11:47.080 which is literally building a protocol
01:11:50.360 to add tether and stable coins onto
01:11:53.239 Bitcoin coin directly uh and you have
01:11:55.920 people kind of like sailor sort of kind
01:11:58.000 of coming out and Manufacturing consent
01:11:59.960 for this thing and doing this you know
01:12:02.040 keynote at pack Bitcoin being like don't
01:12:04.239 be a martyr don't fight the system
01:12:06.120 stable coins on Lightning are going to
01:12:07.760 bring you know 10 trillion dollar to
01:12:10.040 bitcoin and we're it's all going to pump
01:12:11.679 our bags and it's just like guys like
01:12:13.600 what the [__] are we doing like what no
01:12:16.199 let's keep that [__] way off of Bitcoin
01:12:18.880 why would we ever do that um and you
01:12:21.760 know you're seeing that opposite push of
01:12:23.880 the there's the fear push which I
01:12:25.440 totally agree I'm horrified Marty of of
01:12:27.840 what's going to come next because I
01:12:29.199 agree that the diminishing returns of
01:12:31.639 the simulated fear it's like the next
01:12:33.600 thing is I mean 911 was insane covid was
01:12:37.120 [__] insane what the [__] is next
01:12:39.639 like I don't even want to think about it
01:12:41.600 but then we have the other side of the
01:12:43.600 you know again the convenience the
01:12:45.159 carrot versus rather than the stick and
01:12:47.639 you know we have these people
01:12:48.760 manufacturing consent for let's
01:12:50.320 dollarize Bitcoin literally I mean I
01:12:52.040 think that's lightning Labs is like

01:12:53.560 tarot asset like like line is let's
01:12:56.520 Bitcoin eyes the dollar and it's like no
01:12:58.679 you're dollariz Bitcoin like I know what
01:13:00.800 you're doing a couple things here freaks
01:13:03.239 if you're listening don't get the carrot
01:13:04.800 because you get the carrot at the end of
01:13:05.880 the stick you start eating it then you
01:13:07.080 get beat with the stick it's not worth
01:13:09.080 it is not worth it and then two
01:13:13.239 like stable coins and lightning I think
01:13:15.639 Matt Odell does a great job of like I
01:13:17.800 think from a technical architecture it's
01:13:20.440 doomed from the start because you're
01:13:22.159 trying to totally create convenience
01:13:24.560 parody with the tethers and US DC's of
01:13:27.120 the world on top of this interoperable
01:13:29.360 distributed protocol you're just never
01:13:30.719 going to be able to get the same ux or
01:13:32.560 liquidity profile that you could with
01:13:35.960 tether just holding treasuries in a bank
01:13:37.920 and issuing stable coins and centrally
01:13:40.400 issuing them um so I think that's
01:13:42.719 playing into our favor and then Mark I
01:13:44.600 completely agree with you like I don't
01:13:45.719 think we need to dollarize bitcoin at
01:13:48.719 all like I'm a True Believer like we
01:13:51.639 should hyper Bitcoin eyes as as quickly
01:13:53.719 as possible dollar is literally in the
01:13:55.520 early stages of hyperinflation like I
01:13:57.320 think it's a
01:13:58.679 complete waste of time to try to dollar
01:14:01.520 and ironically tether you know it was it
01:14:03.800 was created by Craig sers and you know
01:14:05.679 this Brock Pierce this like Island Boy
01:14:07.800 Group whatever Craig is is cool but you
01:14:10.320 know not not really a big fan of of a
01:14:12.360 lot of these folks and uh you know it
01:14:14.960 was it was an omn coin Master coin thing
01:14:17.000 you know it was on bitcoin you know
01:14:18.800 originally at the GetGo and then you
01:14:21.280 know obviously there was there was huge
01:14:22.600 inefficiency with that so they moved on
01:14:24.600 to you know Joe Luben ethereum
01:14:27.360 basically which the you know Howe letnik
01:14:30.080 said in that when he was talking about
01:14:31.520 how much he loves tether he's like you
01:14:33.280 know hey if we want if we want them to
01:14:35.040 freeze something on Tether you know we

01:14:36.600 call tether and they freeze it if you
01:14:38.639 want someone to freeze something on
01:14:40.120 ethereum you call Joe Luben I mean he
01:14:42.040 literally said that it's [__]
01:14:43.520 hilarious um and then he obviously said
01:14:45.560 with Bitcoin you can't do that right so
01:14:47.040 there is this like State change but yeah
01:14:48.639 tether was you know a big part you know
01:14:50.480 it was on bitcoin at the beginning and
01:14:52.000 now we're you know kind of they're
01:14:53.639 posturing it as this reinvention of this
01:14:55.960 this new thing that's it's like well no
01:14:57.120 we did that 10 years ago or you know
01:14:59.280 nine years ago or
01:15:01.320 whatever it all
01:15:03.320 stinks y I really I really hope people
01:15:06.040 are like SED out and like are mentally
01:15:09.040 strong enough to I mean aren't people
01:15:10.400 burn out of this stuff I mean I I know I
01:15:13.400 am I mean I write about it so that's
01:15:16.199 probably a factor but honestly it's just
01:15:18.400 so
01:15:21.320 insane yeah yeah if look like they're
01:15:24.000 they're sloppy they're lazy like like
01:15:25.880 Joe Biden's our [__] president dude
01:15:27.520 can't
01:15:29.600 even it's becoming GL but I think I
01:15:31.960 think that's on purpose though like I
01:15:33.360 said earlier so like everything they're
01:15:35.040 doing they can write off his
01:15:36.120 incompetence because the person who's
01:15:38.040 the figurehead of the country is clearly
01:15:40.560 incompetent but like a lot of the stuff
01:15:42.639 they're doing is not it it's deliberate
01:15:45.040 and
01:15:46.120 intentional totally you know well that's
01:15:49.199 where I think I think with Joe Biden
01:15:52.800 particularly like they played too big of
01:15:55.159 a hand where it's like you guys really
01:15:56.440 put this [__] in front of us and
01:15:57.679 you're going to expect us to believe
01:15:58.639 that he's well they didn't have anyone
01:16:00.120 else think anybody think because he was
01:16:03.040 well
01:16:05.600 yeah I mean I think it was kind of like
01:16:07.760 someone they had to put in just because
01:16:09.600 of how the the DNC primary was playing
01:16:11.800 out you know he like won what like South

01:16:15.000 Carolina and they were like all right
01:16:16.159 we're running with Joe you know and that
01:16:17.800 was that yeah yeah yep and the Trump
01:16:22.159 stuff I mean you know like yeah 2016 was
01:16:24.560 fun like I get it you know that like
01:16:27.040 there were some great me it was fun that
01:16:28.639 he made fun of Marco Rubio and like Jeb
01:16:30.840 Bush it was very cathartic the dog you
01:16:34.679 know she's ugly Ted you know that's
01:16:36.199 hilarious like he was hilarious very
01:16:38.159 very funny he locked the country down
01:16:40.560 printed trillions of dollars he was a
01:16:42.600 huge proponent of operation warp speed
01:16:45.239 um I mean just this idea of him draining
01:16:48.320 the swamp is so ridiculous um and
01:16:50.840 obviously I think the plan it seems like
01:16:53.159 is to sort of have them come back right
01:16:55.199 and sort of be this kind of like false
01:16:58.000 like hey we you know we took the country
01:17:00.159 back and it's like but it's the same
01:17:01.920 [__] swampy yeah people
01:17:05.360 exactly well I think they need to do
01:17:07.719 that because Trump space has the guns
01:17:10.560 right and so how do you disarm the
01:17:12.520 people with the guns without coming and
01:17:14.360 taking them you make them think that
01:17:16.280 they won and then they're complacent and
01:17:19.760 that's what I think they want to do and
01:17:21.800 that's I don't have an answer to this
01:17:23.480 but I'm wholly convinced that there is
01:17:25.040 no political solution to these problems
01:17:27.560 you're not going to vote your way out of
01:17:28.760 this you're not going
01:17:30.040 to true so Whitney I know we've talked a
01:17:33.480 lot throughout the years about like what
01:17:35.120 can you do uh make yourself individually
01:17:38.000 robust Sovereign sure own food know your
01:17:41.040 neighbors but I just think there's also
01:17:44.280 like a social narrative aspect to this
01:17:46.400 that we really need to get out there
01:17:47.480 it's like these politicians are not
01:17:48.960 going to save you like we need to fix
01:17:50.880 this problem that's why they're not if
01:17:53.159 you keep trusting the politicians and
01:17:55.159 trusting the system to fix itself you're
01:17:57.440 going to end up on your couch with like
01:17:59.040 an Oculus Rift Facebook VR thing or
01:18:02.440 apple thing on your head clunking around

01:18:05.600 in in the metaverse like trying to earn
01:18:08.760 like you know cryptocurrency for like
01:18:12.239 your body heat like that Microsoft
01:18:14.199 patent and [__] like running on a tread
01:18:16.960 treadmill like a literal hamster when
01:18:18.520 you're like not on the sofa um is that
01:18:21.040 what humans are supposed to do is that
01:18:23.440 what humanity is no it's not uh what
01:18:28.639 humans are supposed to do is like go out
01:18:31.040 and build and create stuff that's
01:18:32.639 literally what humans are here to do and
01:18:36.000 so what humans should be doing is
01:18:37.520 building alternative stuff to the model
01:18:40.840 that they have which is become like a
01:18:43.920 human vegetable trapped in the metaverse
01:18:47.840 or whatever you know um let's go out and
01:18:51.840 build stuff in the real world world and
01:18:53.600 like get local and make like real things
01:18:55.639 and we don't have to like say no to all
01:18:58.760 the technology we just have to divest
01:19:00.920 from these crazy people that run the
01:19:03.120 technology right now that they have us
01:19:05.520 dependent on and just make alternatives
01:19:08.480 to those that we can use you know and
01:19:11.360 there's people that can do all that
01:19:12.920 stuff there's people that are doing that
01:19:15.719 stuff um but people have to start being
01:19:18.880 active and this whole thing of like well
01:19:20.960 I'm just going to sit here and live my
01:19:22.360 life as been living it up to this point
01:19:24.040 and not change anything and I'm just
01:19:25.800 going to you know go out in November and
01:19:27.920 vote for one of these two guys that I
01:19:31.440 mean no you're gonna end up in the Pod
01:19:33.880 sorry
01:19:34.960 dude
01:19:36.520 how on this on this trip like how
01:19:38.920 embarrassing has the Malay stuff been
01:19:41.320 where it's like oh yeah this like ancap
01:19:43.480 libertarian guy who ran for president
01:19:46.440 and it's like and he's he wants to
01:19:48.360 dollarize the country bringing in
01:19:50.000 outside Finance years to to dollarize
01:19:52.440 the country from New York Wall Street
01:19:55.719 yeah he's got ex Goldman Sach Caputo as
01:19:58.920 his [__] head of the Central Bank uh
01:20:01.880 picked guy his VP literally was trained
01:20:04.679 by the you know took horses uh you know

01:20:07.719 with the CIA and DC I mean it's just
01:20:10.600 it's like embarrassing but he says
01:20:12.719 parasito he has a chainsaw he makes fun
01:20:15.199 of blue-haired libtards it's like he
01:20:17.520 does the it's the same Trump play the
01:20:19.920 bolsonaro play the same thing where it's
01:20:21.960 like he does the lexicon of the things
01:20:24.360 that we want to hear they ridicule the
01:20:26.960 ruling class in the establishment and
01:20:29.840 they ridicule people that like you know
01:20:33.000 a large segment of the public does not
01:20:35.159 like or is tired of and then they gain
01:20:37.960 trust and support and then when they're
01:20:39.600 in office it's the same people that they
01:20:42.440 put into power so Javier Malay was
01:20:45.760 railing against the establishment of
01:20:48.760 Argentina uh but right so the outgoing
01:20:51.400 president is Fernandez with with
01:20:53.639 Christina Kirchner as his VP so the kers
01:20:56.239 were there but right before them was
01:20:57.639 Mauricio Macker who was a disaster for
01:21:00.040 Argentina also a center-right
01:21:02.480 guy um and Malay uh his economy Minister
01:21:06.440 the head of his Central Bank and other
01:21:08.320 people in his government are all from
01:21:09.760 Mack's government they're not like from
01:21:11.520 outside the political establishment they
01:21:13.280 are the Argentinian political
01:21:15.239 establishment um and they're people from
01:21:17.719 mainly JP Morgan and Deutsche Bank
01:21:19.800 running his you know fiscal policies and
01:21:21.920 all of this stuff and those same people
01:21:24.080 have the same designs that the IMF had
01:21:26.360 for Argentina which is to uh sell
01:21:30.080 Argentina State assets uh to foreign
01:21:33.159 companies specifically in New York which
01:21:34.960 is exactly where Malay went first to
01:21:36.760 seek out uh finan for
01:21:39.320 dollarization so basically uh Malay has
01:21:42.400 done what the IMF was hoping to do to
01:21:44.080 Argentina faster or at least that's how
01:21:46.159 it's shaping up and he you know his
01:21:47.719 first thing too was to devalue the peso
01:21:49.719 by like what like 50 like by like half
01:21:53.719 so that immedi immediately just like
01:21:56.440 worsens the economic situation for
01:21:58.719 everyday argentinians you know uh in
01:22:01.920 terms of their purchasing power it gets

01:22:03.560 like cut in half like that I mean I get
01:22:05.360 the whole thing about like the debt and
01:22:06.880 all of that but I don't um like
01:22:10.400 Argentina has a lot of issues yeah but
01:22:12.960 in terms of and I've explained this on
01:22:14.480 some past podcasts
01:22:16.280 before um but if you look at why
01:22:18.840 Argentina has those problems and how
01:22:20.880 they developed and like why the Central
01:22:22.840 Bank started printing all that money and
01:22:24.440 like why their economy collapsed in 2001
01:22:27.480 the guy that basically engineered that
01:22:29.280 economic collapse was put in charge of
01:22:31.840 the economy again when the economy
01:22:33.840 collapsed and he had like a quasi
01:22:35.920 dollarization plan that mala's
01:22:37.679 dollarization plan is based on and this
01:22:40.120 other guy Domingo Cavo is his name
01:22:42.600 endorsed Malay and his dollarization
01:22:45.040 plan it's like the same crowd and Malay
01:22:48.440 looks different I mean it's not that
01:22:50.000 different than Trump right who in the
01:22:51.880 early '90s was bailed out by rosch child
01:22:53.920 Inc and then uh puts Wilbur Ross in
01:22:56.480 charge of the Department of Commerce the
01:22:58.040 rosch child Banker that bailed him out
01:23:00.320 um as like a a big thank you and then
01:23:03.000 like doesn't really I mean if you think
01:23:05.679 about like Trump's policies and stuff
01:23:07.679 like when he was president like a lot of
01:23:09.199 people have forgotten like what he
01:23:10.639 actually did sort of like Mark brought
01:23:11.920 up like you know operation warp speed in
01:23:14.000 in the lockdowns and all of this stuff
01:23:16.159 right uh but he also had you know people
01:23:18.040 like to say that Trump is like anti-war
01:23:19.840 and like anti-interventionist but uh his
01:23:21.960 National adviser was John Bolton guys
01:23:25.000 Trump did
01:23:26.120 that uh who do you think'll have this
01:23:28.880 time you know um it's it's problematic
01:23:32.840 and so like the idea that like where is
01:23:34.719 going to you know trust the plan and
01:23:37.880 that these guys are going to help us
01:23:39.120 when trust was Trump was in for four
01:23:41.040 years did he drain the swamp n um he
01:23:44.199 enabled the swamp he'll do that again
01:23:47.320 and I think a lot of this stuff this you

01:23:49.280 know martyrdom of trump in terms of like
01:23:52.040 oh they're going to take off theot in
01:23:53.520 these states I think that's uh I think
01:23:55.719 that's aop personally I think they want
01:23:58.280 Trump in because remember they wanted
01:23:59.960 Trump to be the nominee back in 2016
01:24:02.080 that was a deliberate policy that came
01:24:03.600 out because of WikiLeaks like we know
01:24:05.440 that they like wanted Trump to be the
01:24:07.719 Republican
01:24:08.960 nominee Democrats work to make that
01:24:11.880 happen yeah in the within the podesta
01:24:14.239 Leakes which I highly recommend everyone
01:24:15.800 always talks about how great asses in
01:24:17.679 Wikileaks is but no one ever actually
01:24:18.960 reads the [__] [__] go through the
01:24:20.639 podesta leaks it's [__] horrendous
01:24:22.679 scary but talk a lot about yeah there
01:24:25.320 there were Clinton staffer emails where
01:24:26.800 they literally are like we want Trump
01:24:28.440 yeah you're exactly right it's it's it's
01:24:30.600 no accident at all and you look at right
01:24:33.920 and you look at the you know there's
01:24:35.239 this you know the the Soviet
01:24:37.320 intelligence you know play called
01:24:39.239 operation trust that they ran uh which
01:24:41.719 is basically exactly the same Playbook
01:24:44.199 that they're running now with Trump if
01:24:46.719 you include you know it's I think it's
01:24:48.360 pretty safe to say at this point like
01:24:49.960 the Q Trope is is is an intellig
01:24:52.719 operation pretty much I think that's
01:24:54.520 relatively safe to say um this trust the
01:24:57.520 plan there's this guy who's going to
01:24:59.199 take care of everything this [__]
01:25:00.800 false savior guy who's gonna blah blah
01:25:03.440 blah and and don't do anything about it
01:25:06.159 don't don't go after these bad people we
01:25:08.440 got the guy he's in there just sit back
01:25:10.760 drink your Double Gulp uh watch your
01:25:13.239 Netflix it's going to be fine um and now
01:25:16.159 here fting the swamp right yeah I mean
01:25:20.679 stop believing that was QA on just a big
01:25:24.119 SC up to get everybody away from Pizza
01:25:25.840 gate because of the podesta emails 100 a
01:25:27.840 th% a th I was there when it all
01:25:29.920 happened that was I mean I've talked
01:25:31.800 with Whitney about this before like that

01:25:33.360 was the thing that really broke my brain
01:25:35.520 was like going through the podesta leaks
01:25:37.280 and in yeah like 2016 2015 I think the
01:25:40.360 end of 2015 into 2016 um and like just I
01:25:45.520 knew something was just so wrong like
01:25:47.760 you just my intuition right was just
01:25:49.639 something is disgusting here and then I
01:25:52.400 saw it be you know I saw forchan be
01:25:55.440 basically bombarded and it turned into
01:25:57.639 this I even think pizzagate Trope a lot
01:26:00.000 of that stuff was a distraction away
01:26:02.719 from the actual things that were in the
01:26:04.440 podesta emails and a lot of the stuff
01:26:06.480 and then by the time Q came out it was
01:26:08.440 just a total you know trust sessions you
01:26:11.960 know it became this you know people are
01:26:13.560 analyzing clock things and you know it
01:26:16.040 was just it became such a a goose chase
01:26:18.800 of a rabbit hole yeah take the model for
01:26:21.679 sorry the model for Q andon was created
01:26:23.520 a few years earlier by Cass sunstein who
01:26:25.679 was an adviser to the Obama White House
01:26:27.960 he's married to Samantha Powers who's
01:26:29.840 currently head of usaid which is pretty
01:26:32.119 much known these days to be like a CIA
01:26:34.080 front yeah uh and he's also like a top
01:26:37.719 guy at the World Health Organization now
01:26:39.520 and has been since covid he's all about
01:26:41.480 getting people to like alter their
01:26:43.080 behaviors and he wrote this paper about
01:26:45.480 how to disarm um conspiracy movements
01:26:49.280 from within and instead of getting them
01:26:51.320 to distrust the government to trust the
01:26:54.320 government literally what K and on did
01:26:56.800 and he wrote the the road map for it
01:26:58.520 before and to think that one it have
01:27:00.159 been followed um I you know think it's
01:27:03.440 important but also like the podesta leak
01:27:05.520 stuff you know I think also aspects of
01:27:07.440 pizzagate there were people that were
01:27:08.920 like put in there to like ridicule the
01:27:10.679 whole idea that like there would be this
01:27:12.239 type of like sexual behavior
01:27:14.040 specifically um from our political
01:27:15.960 Elites and of course this is a couple
01:27:17.639 years before the Epstein Scandal breaks
01:27:19.719 for example right and from that we have
01:27:22.239 you know uh among many other things what

01:27:24.920 these emails between people like Jess
01:27:26.719 Staley and abstein being like what
01:27:29.360 Disney princess do you want next and all
01:27:31.440 of this stuff right and like there's
01:27:33.400 stuff like that in the podesta emails
01:27:35.480 like we can't talk about that apparently
01:27:37.800 but they want to like
01:27:44.400 ridiculizar in charge of this why is it
01:27:47.280 being rushed why is it being forced on
01:27:49.119 people and then people being like it's
01:27:50.920 going to turn you into a 5 G and it's
01:27:53.000 99% graphine oxide based on a study that
01:27:56.320 didn't actually conclude that um look
01:27:58.880 this magnet next to my arm now it's like
01:28:00.800 what you fell for it yeah but I I mean
01:28:03.000 they do this kind of stuff all the time
01:28:04.880 and it's to try and get reasonable
01:28:06.520 people from looking into stuff and just
01:28:09.320 to do what the term conspiracy theorist
01:28:11.679 as a pejorative was designed to do which
01:28:14.520 is to get the the whole laughter
01:28:16.719 response when you uh criticize the
01:28:19.119 government and say it's up to no good um
01:28:21.840 and
01:28:22.560 honestly there has to be a change in in
01:28:24.480 tactic from those of us who want to
01:28:26.239 reach people uh with this stuff because
01:28:29.000 I think too many people even an
01:28:30.199 alternative media are willing to like
01:28:32.000 buy into stuff when it comes out and
01:28:34.040 gets viral without looking into it and
01:28:35.600 then they propagate it like people have
01:28:37.719 to do a lot more I think D did due
01:28:39.880 diligence and realize that like this is
01:28:41.440 an info War I mean Hillary Clinton said
01:28:44.520 that years ago and she's like we're
01:28:45.679 losing the infow war and all of this
01:28:47.600 stuff like they were then for sure and
01:28:50.639 they obviously invested a ton of money
01:28:52.960 and not doing that do you know how many
01:28:54.719 Bots the US government and specifically
01:28:56.840 just like the military alone has to like
01:28:59.480 shape narratives online on social
01:29:01.920 media and and think about how chat GPT
01:29:04.719 has just like boosted that kind of stuff
01:29:07.760 the whole plan is to not have anyone
01:29:09.560 know what's real or fake anymore and AI
01:29:11.840 is I mean is being used for that it's

01:29:13.760 like overtly admitted to in this book
01:29:16.199 that Henry Kissinger and the and the
01:29:18.480 former Google CEO Eric Schmidt wrote
01:29:20.920 together it's explicitly about that and
01:29:23.639 then having us be so dependent on AI
01:29:25.760 technology specifically generative AI
01:29:28.679 that we become cognitively diminish and
01:29:30.679 we can't even write anymore we can't
01:29:33.639 communicate without AI and then we can't
01:29:35.880 perceive reality what's real or not
01:29:38.000 without AI telling us and that's this
01:29:39.639 whole Gambit here with like
01:29:41.280 censorship um going on right now that
01:29:44.080 we're you know AI is going to be in
01:29:45.800 charge not just of saying deciding what
01:29:48.400 content you can see but it's also going
01:29:49.880 to be producing the bulk of the content
01:29:52.560 humans won't be anymore and that's
01:29:54.679 already happening guys um so the best
01:29:58.199 way to deal with that is to spend a lot
01:30:01.800 more time in the real world talking to
01:30:03.719 real people because like what you see on
01:30:05.639 Twitter and all of this stuff is like
01:30:07.520 more insane it's going to be more insane
01:30:10.199 than it is now right now it's more
01:30:11.679 insane than it's ever been before and
01:30:13.239 that's only going to continue escalating
01:30:15.000 because it's just going to it's G to be
01:30:17.520 nuts you know and focus on building
01:30:21.960 other things not focusing on all these
01:30:23.960 distractions and scops that are
01:30:25.520 constantly going to be online and you
01:30:28.040 know another aspect of this like
01:30:30.440 remember in 2016 when like Hillary
01:30:32.400 Clinton that they were all saying it was
01:30:34.360 like 99% chance she was going to win
01:30:36.880 based off of literal fake polling they
01:30:39.000 just like made it up to try and
01:30:40.520 demoralize Trump voters and not have
01:30:42.400 them go vote that same tactic they do to
01:30:45.679 people all the
01:30:46.920 time to make us think that like we're
01:30:49.600 alone and we're isolated and no one else
01:30:51.840 sees this stuff to demoralize us and
01:30:55.639 Facebook specifically experimented with
01:30:58.480 trying to manipulate newsfeeds to make
01:31:00.880 people feel that way it's like a matter
01:31:03.000 of record it was like 10 years ago they

01:31:05.719 still do that stuff all the time totally
01:31:08.239 so like if you're if you're not looking
01:31:11.000 at at social media as like a war zone
01:31:13.800 you need to otherwise you are very
01:31:16.080 susceptible to all of this stuff and
01:31:19.239 then you have I mean you know Peter teal
01:31:21.840 being a huge part of that Trump Facebook
01:31:24.199 manipulation of course and then you know
01:31:27.119 you have uh you know this Twitter
01:31:30.520 transition team basically exactly and
01:31:33.080 then so you have him you know with his
01:31:34.679 Rumble stuff you know buying out you
01:31:37.199 know the you know the Glenn green wals
01:31:39.520 and then you have Elon you know buying
01:31:41.600 out Matt taibi and Barry Weiss and and
01:31:45.000 the whole Twitter file limited hangout
01:31:47.239 [__] that was you know hey where are
01:31:49.960 the files like release these things why
01:31:52.480 didn't don't we have a new system for
01:31:54.239 doing this it's you drop the files
01:31:56.159 publicly you don't get eight Google
01:31:58.440 searches with Elon Musk over your
01:32:00.239 shoulder you know going through the
01:32:01.520 files and only able to write about that
01:32:03.400 so you have these incredibly popular uh
01:32:07.119 limited Hangouts uh so that people that
01:32:09.840 do you know don't trust the the modern
01:32:12.280 narrative go towards these uh you know
01:32:15.080 lightning rods they're forced down into
01:32:17.639 these very controlled operations um that
01:32:21.080 are literally funded by you know Pierre
01:32:24.440 uh and and Peter teal and and these guys
01:32:27.719 and and so you you the it's all the
01:32:30.280 counter narrative is exactly it's funny
01:32:33.320 how PayPal keeps coming up it's so
01:32:34.679 interesting um and uh you you the the
01:32:37.840 controlled narrative is is uh or the
01:32:40.360 counter narrative rather is just as
01:32:41.960 controlled as the mainstream narrative
01:32:43.679 and Indie media is just as controlled as
01:32:46.280 mainstream media it's just as click
01:32:48.119 baity it's just as fake and and dumb uh
01:32:51.840 as as mainstream media and and we're in
01:32:54.679 this place now where it's like there's
01:32:57.239 like four people that I like trust that
01:33:00.800 I think good do good news coverage and
01:33:02.840 I'm talking to like two of them you know
01:33:04.360 what I mean it's like it's it's it's

01:33:06.159 pretty miserable out there um and I
01:33:08.400 think people have to just be like way
01:33:10.280 more uh aware of of just how kind of in
01:33:14.800 insane the the
01:33:16.560 control of the narrative really is it's
01:33:20.159 critical thinking needs to make a
01:33:21.840 comeback big time yeah and that's why
01:33:24.280 the pesta
01:33:25.520 emails like anchoring back to that pizza
01:33:27.760 gate I anchor to two things the podesta
01:33:29.199 emails like what the [__] is a pizza
01:33:30.560 related handkerchief what is Walnut
01:33:32.480 sauce never heard of
01:33:37.440 those Instagram page when it first
01:33:39.920 dropped like I went to it took
01:33:41.119 screenshots like that [__] was real it
01:33:42.800 was very creepy totally and
01:33:47.679 it's the controll
01:33:50.080 narrative side of things because as
01:33:53.159 we've talked for most of this discussion
01:33:55.080 like with Bitcoin like there's this
01:33:56.320 controlled narrative coming to bitcoin
01:33:58.520 I'm very happy number one you guys wrote
01:34:00.159 this piece and number two Mark you said
01:34:01.560 some things that you did earlier like as
01:34:02.880 bitcoiners I do truly view Bitcoin as
01:34:06.679 the most potent tool we have to get away
01:34:08.440 from this control the money you can
01:34:10.360 control the world if we can take their
01:34:12.480 control money out of their hands by
01:34:14.239 making Bitcoin succeed we actually have
01:34:16.360 a chance of getting away from this
01:34:18.000 dystopian hellscape
01:34:19.880 but they're
01:34:22.239 infiltrating and I that's what I worry
01:34:25.040 about like moving forward is like all
01:34:26.960 right how do you preserve
01:34:29.960 the the properties of Bitcoin that make
01:34:33.040 it worth actually using without it
01:34:35.800 getting co-opted before that
01:34:39.440 totally I mean that's the thing that's
01:34:41.239 so crazy you know like there's the this
01:34:42.960 whole Narrative of you know it you know
01:34:45.520 it empowers the the unbanked and all
01:34:48.199 this stuff well it's like well it
01:34:49.639 empowers the doj holding 200,000 Bitcoin
01:34:53.320 just as much as it empowers you know the
01:34:55.440 guy selling papooses on bitcoin Beach

01:34:57.639 right it's like uh but times 200,000
01:35:02.280 right uh so there's like a lot of power
01:35:05.080 and responsibility I think as voices
01:35:08.639 within this system that I think people
01:35:10.600 have we just you know I've kind of made
01:35:12.400 it my mission of 2024 to just like like
01:35:15.719 scorched Earth it's like I I I don't
01:35:17.960 care about being kind of nice to these
01:35:19.679 people anymore it's like I see what
01:35:21.119 they're doing I see them Infiltrate The
01:35:23.280 conferences and the spaces the way that
01:35:25.159 they write the things that they push the
01:35:26.920 things that they manufacture consent for
01:35:29.600 the things that they uh you know
01:35:31.800 apologize for um and I think stable
01:35:34.400 coins is the easy one to really look at
01:35:36.719 because it's just like this is the
01:35:38.280 dollar system this is the
01:35:39.679 military-industrial complex this is the
01:35:41.840 doj this is the CIA this is the FBI this
01:35:45.360 is the US [__] government like what
01:35:47.679 are we doing why are we letting these
01:35:49.760 people into our stable you know no pun
01:35:52.880 intended why are we letting these wolves
01:35:54.600 in um you know and and and there's so
01:35:57.520 many ways that Bitcoin can monetize and
01:35:59.639 succeed and actually make life way worse
01:36:03.360 for the majority of humans on Earth I
01:36:06.199 think you know we'll probably you know
01:36:08.280 it be fine to some degree because we
01:36:10.560 know how to consolidate utxos and coin
01:36:13.480 control and and you know we self-
01:36:15.360 custody and you know we've been in it
01:36:16.880 for years so we're we're like set up but
01:36:19.400 you know there's not that many
01:36:20.600 bitcoiners
01:36:21.960 um really and if things monetize
01:36:24.440 insanely here because of ETFs because
01:36:26.040 the regulatory Mode's finished all this
01:36:27.639 stuff it's like okay well the doj makes
01:36:29.480 billions and trillions of tens of
01:36:31.520 trillions of dollars and like the four
01:36:34.080 of the four people in the Bitcoin space
01:36:36.800 that get it make you know a couple
01:36:38.880 million but that million is worth
01:36:42.320 \$100,000 in today's dollars because
01:36:44.639 everything's blown up anyway and it's
01:36:46.080 like is the world really that much

01:36:47.600 better of a place um if like 8 billion
01:36:50.760 people can't afford Bas layer
01:36:52.199 transactions so there's a lot of things
01:36:54.239 that can kind of go wrong in the
01:36:56.000 monetization of Bitcoin um if not done
01:36:58.760 right with like really good education
01:37:00.400 and um you know really like thoughtful
01:37:03.480 articulate like the next steps the next
01:37:06.040 year the next two years uh are just so
01:37:09.440 important um you know for Bitcoin and I
01:37:12.440 think we need to understand the stakes
01:37:15.000 but not be demoralized and know that it
01:37:16.920 is still an open protocol it is still a
01:37:18.840 system uh we can build whatever the [__]
01:37:20.880 we want on it you know we can build you
01:37:23.239 know torrent seeding incentive
01:37:25.880 structures e-cash structures lightning
01:37:29.239 fun stuff right well I'm happy he said
01:37:31.360 ecash because I think like stability
01:37:33.239 pools and chammy and mints is could coin
01:37:37.600 killer 100% I agree or you could build a
01:37:40.400 stable coin using ecash or using
01:37:42.800 lightning channels stable channels that
01:37:44.920 don't touch treasuries at all and you
01:37:47.320 have you don't we don't need the dollar
01:37:48.639 system to exist but we can have the idea
01:37:50.679 of a state able unit of account that's
01:37:53.760 great let's do that that sounds awesome
01:37:55.599 we can build that people have already
01:37:56.880 built it actually it's pretty incredible
01:37:58.920 uh we don't need to buy treasuries we
01:38:00.440 don't need to continue on you know
01:38:02.199 frankly the US government's the biggest
01:38:03.639 terrorist organization in the world I
01:38:05.360 mean they just are so why are we saying
01:38:08.119 that we're banking the unbanked and and
01:38:10.280 and serving the global South by
01:38:11.840 perpetuating the biggest terrorist
01:38:13.520 organization in the world no it really
01:38:15.320 is it was poetic too when Elizabeth
01:38:16.960 Warren and Jamie Diamond were powwow on
01:38:19.560 Capitol Hill talking about how does use
01:38:21.599 for
01:38:23.239 terrorism three months after paid a \$75
01:38:25.800 million settlement fine with the Virgin
01:38:27.760 Island for the Epstein stuff and you
01:38:29.239 mentioned Les Staley who was The Man
01:38:31.400 Behind uh J Jamie Diamond as

01:38:36.480 well JP Morgan was caught with like a
01:38:39.840 ridiculous amount of cocaine on a boat
01:38:41.599 that they ran I mean it's like they were
01:38:43.199 trafficking a container yeah it was yeah
01:38:47.719 like give me a [__] break your this
01:38:49.480 ethical [__] we know the majority of
01:38:51.599 financial crime is done with the dollar
01:38:53.159 it's not even close Bitcoin by stupid
01:38:56.719 criminals sorry well to take this back
01:38:58.920 to the whole thing of like Jamie Diamond
01:39:01.280 programming your money and like not
01:39:02.920 Jerome pal okay remember how Jamie
01:39:05.080 Diamond a few months ago was like well
01:39:07.080 we should just seize people's private
01:39:09.400 property for you know climate change
01:39:11.800 policy remember that like private
01:39:14.599 property doesn't exist to Jamie Diamond
01:39:16.719 if his friends at Goldman Sachs who
01:39:18.719 basically designed all this like crap
01:39:21.560 that the UN is backing and green finance
01:39:23.920 and blue Finance for Mother Earth and
01:39:26.639 whatever you know uh if those projects
01:39:30.639 decide that they want your property uh I
01:39:33.080 guess they'll just turn off your money
01:39:34.760 or whatever and take it I mean do you
01:39:38.440 really want to give these guys total
01:39:41.440 control I don't um but they have big
01:39:44.360 plans I mean remember Marty I came on I
01:39:47.159 guess probably a couple years ago now
01:39:48.679 and we talked about natural asset
01:39:50.040 corporations how they're trying to
01:39:51.679 securitize the entire natural world and
01:39:53.800 now they're going to tokenize those
01:39:55.080 Securities and whoa it's going to be
01:39:59.400 wild yeah it's uh stgs is going to pump
01:40:04.080 like the most insane like Wall Street
01:40:06.080 Casino the world has ever seen no one
01:40:07.920 talks about that stuff either it just
01:40:10.360 drives me crazy uh but again bricks
01:40:13.920 countries Western countries all on board
01:40:16.639 for agenda 2030 the people in charge of
01:40:21.000 climate Finance for the UN Mike
01:40:24.800 Bloomberg the billionaire and Mark
01:40:28.360 Carney I think your viewers know enough
01:40:30.639 about Mark Carney to know why that's
01:40:32.119 insane and to think that Mark Carney and
01:40:34.760 Jamie Diamond and Mike Bloomberg and
01:40:37.679 Bill Gates and all of these guys just

01:40:40.280 care so much about the planet and not
01:40:42.199 about robbing you of all of your wealth
01:40:45.119 which is what they've spent their entire
01:40:46.840 careers doing I just come on guys we
01:40:50.159 have this we have to to like watch what
01:40:52.000 people do and like judge them by their
01:40:54.480 actions and like not when they say stuff
01:40:56.760 like whether it's cloaked humanitarian
01:40:58.880 goobly guck or it's Trump being like
01:41:01.440 making fun of Hillary Clinton and Jeb
01:41:03.199 Bush and it's very cathartic yes but
01:41:05.159 like look at what the guy does too when
01:41:07.480 he is in power he'll do the same thing
01:41:10.280 again you know I think I think we've
01:41:12.520 showed this on one of our episodes in
01:41:13.920 the past but I'll never pass on Shilling
01:41:15.719 this go to the best evidence YouTube
01:41:18.000 channel and look up
01:41:19.840 all
01:41:22.000 p l n a r y apostrophe s all the plan
01:41:24.800 Aries men John Titus did a dis of the
01:41:30.599 HSBC yeah the Mexican drug cartel um
01:41:34.880 moneya laundering event with HSBC Mark
01:41:37.599 harney's involvement in that is
01:41:39.480 astonishing
01:41:41.440 um he doesn't care about the planet guys
01:41:44.159 I mean honestly green Finance is the
01:41:46.040 biggest grift in the world it's like
01:41:49.400 because they literally are going use and
01:41:51.679 sell off the entire natural world for
01:41:54.960 the grift I mean claim it's
01:41:59.800 environmental he was the Finance
01:42:01.400 Minister of the UK he did something in
01:42:03.119 Canada head of the bank of England and
01:42:05.520 the Bank of Canada so two central banks
01:42:07.880 what Financial stability board top guy
01:42:09.760 at Goldman
01:42:11.159 Sachs um friend of the environment you
01:42:15.920 know I mean it's such a running Trope I
01:42:18.520 mean you saw it with with just Maxwell's
01:42:21.760 like teramar project and the citizens of
01:42:24.000 the sea and it's it's digital identity
01:42:26.960 and citizenship and faux protection of
01:42:30.199 the environment as a way to basically
01:42:32.560 like traffic
01:42:33.840 launder uh and and make tons of money
01:42:36.800 for you know I mean it's it's uh it's a
01:42:38.840 disgusting

01:42:39.880 racket well speaking of I me what we
01:42:42.599 have right now is them literally
01:42:43.960 tokenizing all their existing rackets to
01:42:46.119 move it into this new like fourth
01:42:47.880 Industrial Revolution Paradigm that's
01:42:49.760 literally what has happened Happ across
01:42:51.320 the board and people just like don't
01:42:52.880 recognize it and they're cloaking it in
01:42:55.000 all the stuff like specifically with
01:42:56.560 like stgs and agenda 2030 it's like this
01:42:59.080 will make a better world and then you
01:43:00.880 actually like look at it and it's like
01:43:03.000 this is insane why are all Bankers in
01:43:06.400 charge of
01:43:07.599 this you know like I on the planet you
01:43:11.840 want the smartest people doing this
01:43:13.560 smartest people um if they're rich
01:43:15.920 they're smart
01:43:17.800 so it is oh man I hate it so much but I
01:43:21.599 mean you go back into like the UN like
01:43:23.800 the UN Secretary General kofan like at
01:43:26.280 the end of the 90s was like yeah so you
01:43:28.880 know how we used to be at least viewed
01:43:31.199 as like a the public sector you know the
01:43:35.000 public sectors of the world all coming
01:43:36.520 together to like democratically vote on
01:43:38.320 stuff well now we've basically been
01:43:40.159 taken over by corporations and how the
01:43:42.199 business of the businesses of the world
01:43:44.280 is our business you know I'm
01:43:48.119 paraphrasing but that's what he said you
01:43:50.440 know I like to think
01:43:52.159 it's the's not your friend guys no um
01:43:59.920 it's there's so much I could say anyway
01:44:03.920 I could literally go on for hours and be
01:44:05.639 like here's an example of why you should
01:44:07.840 never trust the bankers and still
01:44:09.280 there's going to be that handful of
01:44:10.719 people with the hashtag Jerome pow is my
01:44:13.280 pal and Jamie Diamond is my night and
01:44:15.880 Shining Armor and I I don't I sometimes
01:44:19.560 you just can't reach people dude you
01:44:20.920 know qan on you
01:44:24.679 know okay that was pretty good that's I
01:44:27.360 really do
01:44:29.679 think I do think uh I think the
01:44:32.960 inflationary pressure that people are
01:44:34.280 feeling in their everyday lives right

01:44:35.599 now is like a catalyst that is going to
01:44:38.800 push people towards ours well that's
01:44:40.440 what I said earlier if you there they in
01:44:42.840 order to create this space where they
01:44:45.960 want to like push people into this new
01:44:47.800 system there's going to be chaos and
01:44:49.360 there's going to be instability and so
01:44:51.080 the comfort and convenience that keeps
01:44:52.840 people asleep will be disrupted what
01:44:55.239 people do in that point in time is the
01:44:57.320 most critical about this whole thing
01:44:58.880 about how it plays out seriously like
01:45:00.880 that is the most important window and
01:45:03.119 again that is why it's so important to
01:45:04.800 be local because okay there's a big
01:45:07.239 cyber Tech on the financial system the
01:45:08.760 internet goes down for a couple of days
01:45:10.239 what are people going to do they're
01:45:11.360 going to go out in the street and look
01:45:12.599 for answers figure out what's going on
01:45:14.639 this is why it's important to know
01:45:16.760 what's going on and couple that with how
01:45:20.719 having you know Connections in your
01:45:22.880 local community so you can direct people
01:45:25.719 about what needs to be done and what's
01:45:27.800 happening at that point in time it's
01:45:29.920 like very important yeah and prep them
01:45:32.199 for when the internet gets turned back
01:45:33.679 on don't believe anything these people
01:45:34.920 are telling you well also the internet
01:45:36.760 when it turns back on isn't going to be
01:45:38.159 like the internet now at all they're
01:45:40.280 going to put AI in charge of like
01:45:41.639 literally all content your ID is going
01:45:44.199 to be tied to not just everything you
01:45:45.840 post online uh but everything you read
01:45:49.119 and consume every site visit and they
01:45:52.239 plan to pass all of that through AI to
01:45:54.880 determine if you're a threat to the
01:45:56.520 system or not this is all like
01:45:58.639 predictive policing all of the stuff is
01:46:00.440 built into this system specifically in
01:46:02.679 the US the bid Administration already
01:46:04.800 has the policy framework developed
01:46:06.360 they've had it since I mean they first
01:46:08.520 came in to power in 2021 it's funny it's
01:46:12.159 been there for two years the prism and
01:46:14.440 the muscular programs that you know were

01:46:17.119 kind of uh you know uh exposed in the
01:46:21.000 the Snowden and Vault 7 and you know a
01:46:23.040 lot of the the Wikileaks uh you know we
01:46:25.560 we know directly that the US government
01:46:27.480 has access to uh you know the the
01:46:30.400 profiles of whoever they want on Yahoo
01:46:33.080 on Google you know on on Facebook on
01:46:35.480 these these huge uh you know private
01:46:38.440 public sector blurriness and then as
01:46:40.679 well I think specifically the
01:46:41.800 interesting thing about the muscular
01:46:43.119 program is that uh not only do they with
01:46:46.119 prism they can just ask basically
01:46:48.119 without a subpoena without a warrant
01:46:49.560 they can ask for inform information on
01:46:51.040 on user accounts but with muscular they
01:46:52.960 were actually directly attaching
01:46:55.480 themselves to the fiber optic lines of
01:46:58.000 Yahoo servers and they were taking
01:47:00.119 people's information directly even
01:47:01.719 though they had access where they could
01:47:03.280 file paperwork and get anything they
01:47:05.840 wanted directly from Yahoo the US
01:47:07.960 government was like that you know NSA
01:47:09.599 and CIA were like hey let's do this
01:47:11.119 project where actually we can just pull
01:47:12.360 it directly from the fiber optic cables
01:47:14.599 and then there's less of a of a paper
01:47:16.159 trail so uh you know you start to look
01:47:18.400 at you know who's actually controlling
01:47:19.719 the infrastructure of the internet and
01:47:21.599 you're seeing a massive explosion of
01:47:24.360 Submarine optic cables that are owned by
01:47:26.719 these these companies you know Google
01:47:28.159 owns or partially owns 8.5% of all
01:47:31.520 submarine fiber optic lines in the
01:47:33.960 entire world Facebook just did one where
01:47:36.239 they went all the way around Africa um
01:47:38.920 Amazon is right behind Google they have
01:47:41.320 like just under I think it's like
01:47:43.239 990,000 kilometers of cables Microsoft
01:47:46.760 has a ton and then of course you know
01:47:48.520 then there's the starlink play and Elon
01:47:50.199 is is a total you know DARPA boy as well
01:47:53.199 um subsidized by the government in so
01:47:54.760 many ways and you know the
01:47:55.960 infrastructure of the modern internet is
01:47:58.080 is on a physical level very co-opted and

01:48:00.760 as soon as they want to basically flip
01:48:02.440 that
01:48:03.199 switch they
01:48:05.639 will lovely and do this Eric Schmidt
01:48:11.119 right who basically runs like AI
01:48:13.599 national security policy for the US uh
01:48:15.960 too and is like funding all this science
01:48:18.400 and technology policy stuff basic
01:48:20.520 basically key officials in that at the B
01:48:22.920 Administration are being paid their
01:48:24.400 salaries are being paid by Eric Schmidt
01:48:26.040 it's like super illegal and political
01:48:28.119 reported on it and like nothing was done
01:48:29.840 they were like well I see you found out
01:48:32.800 and that is that that guy has an insane
01:48:35.400 amount of power he was just on a podcast
01:48:38.119 uh talking about what needs to be done
01:48:39.719 about misinformation and he was saying
01:48:42.760 uh yeah uh we need to uh get everyone's
01:48:46.159 ID tied to social media and then when
01:48:48.599 people post misinformation reports them
01:48:50.400 to law enforcement oh lovely remember
01:48:53.320 how that guy posted stuff about how he
01:48:55.239 hated Joe Biden uh and how Joe Biden
01:48:57.719 shouldn't come in his neighborhood and
01:48:58.840 all this stuff uh on Facebook and then
01:49:00.880 the FBI shot him in front of his house
01:49:02.800 and he was like an old disabled guy yeah
01:49:05.199 the fat yeah fat old guy Eric Schmidt's
01:49:08.360 idea is a very bad
01:49:10.239 idea it's a very bad idea Eric Schmidt
01:49:13.960 is also a dangerous fascist who controls
01:49:16.320 a large amount of US government policy
01:49:18.320 right now and how the government in the
01:49:20.520 intelligence agencies in the military
01:49:22.520 plan to use
01:49:24.000 AI yeah and meanwhile Larry pagee has
01:49:27.159 been missing for like six months and no
01:49:29.360 one knows where he is because the usbi
01:49:31.679 is uh hiding from the subpoenas in the
01:49:34.639 Epstein case and they all these guys own
01:49:37.320 islands that like Richard Branson with
01:49:39.159 the with the sex CT the uh you know on
01:49:41.920 his Necker Island where I believe serg
01:49:44.320 Brin was married and he was the best man
01:49:46.880 Larry pagee has an island I mean all
01:49:48.760 these guys there's this huge Island Boy
01:49:50.920 Consortium of Google you know stable

01:49:54.000 coin and they love to with Jamie Diamond
01:49:56.520 uh it turns
01:49:59.960 out yikes interesting um do we need
01:50:03.280 another Occupy Wall Street I know you
01:50:04.760 mention it I know you said they don't
01:50:06.639 like yeah dude but it's I mean they
01:50:09.239 don't want that they don't want that and
01:50:12.239 so what has to be done is people have to
01:50:14.119 divest from Silicon Valley and Wall
01:50:17.480 Street as much as possible um because
01:50:21.360 basically what I call the blob that
01:50:23.800 basically runs the US it's the National
01:50:26.040 Security State it's Silicon Valley and
01:50:27.719 it's Wall Street okay it's harder to
01:50:30.040 divest from the US government if you're
01:50:31.679 living in the US than it is to divest
01:50:34.199 from Big Tech and Wall Street you can
01:50:36.480 take your money out of JP Morgan and
01:50:39.440 Wells Fargo and City and you can stop
01:50:43.040 using Google products Microsoft products
01:50:46.239 you can uh not use open AI maybe which
01:50:48.880 is basically Microsoft
01:50:50.639 um and all of this other stuff um
01:50:52.679 because they plan to do a lot of bad
01:50:54.320 stuff with your data like a lot of very
01:50:57.320 bad things uh here's an example that's
01:51:00.880 uh very blackpilling sorry everybody
01:51:03.800 okay so what's going on right now in in
01:51:05.800 Israel right uh the IDF uses an AI
01:51:09.880 algorithm called that they literally
01:51:11.920 call the
01:51:14.000 gospel and they said the IDF officials
01:51:17.000 have said that before the gospel they
01:51:21.280 identified 15 20 targets to assassinate
01:51:24.760 in Gaza a day now that they use the
01:51:27.360 gospel the AI algorithm identifies
01:51:31.119 hundreds right and what are the metrics
01:51:33.719 for identifying who gets to live and who
01:51:35.440 dies well they won't tell anybody uh but
01:51:38.360 a lot of the people that have been
01:51:39.719 killed have been women and
01:51:41.599 children was it because they liked a
01:51:44.079 post that Hamas made on a social media
01:51:46.280 network was it because their cousin is
01:51:48.639 in Hamas was it because they went to a
01:51:51.840 person's house who a p a relative of
01:51:54.840 Hamas lives there I mean it's very broad
01:51:57.760 isn't it uh no one really knows so it's

01:52:00.280 very likely that because of the
01:52:02.480 surveillance dragnet that Israeli cyber
01:52:04.639 security companies test out first in
01:52:07.040 Palestine and then export around the
01:52:09.400 world because that cyber security
01:52:11.440 segment of Israel's economy is like a
01:52:13.400 major part of their GDP and they test it
01:52:16.199 out there right so Palestinians are some
01:52:18.440 of the most surveilled data people on
01:52:20.679 the planet that data is being fed gopel
01:52:25.280 except on October 7th that it was down
01:52:28.199 that day we're not sure whatever yeah
01:52:31.079 just like NORAD on 911 and all this
01:52:33.159 stuff
01:52:35.520 exactly so interesting um yeah and then
01:52:38.280 they called it their 911 um you know
01:52:41.320 very interesting um but anyway uh this
01:52:45.280 data that's been harvested on
01:52:46.360 Palestinians is now being used to decide
01:52:48.159 which of them are blown up or or
01:52:51.639 not yeah what happens when we get to
01:52:53.840 that point do you know who runs the AI
01:52:56.520 weapon stuff in the US that's also being
01:52:58.679 tested not just I mean Israel has their
01:53:01.079 own but the US has it too it's being
01:53:02.760 tested in Ukraine to decide who lives
01:53:04.560 and and dies it's Peter teal and Palmer
01:53:07.800 lucky who created Oculus which was sold
01:53:10.119 to Facebook because of Peter teal um
01:53:12.719 and all of this stuff it's the same
01:53:14.520 crowd Peter teal runs palente here that
01:53:16.760 you harvest your data for intelligence
01:53:18.639 agencies every int agency in the US uses
01:53:21.320 it and it profiles people and they can
01:53:23.760 label you as subversive and paler is the
01:53:26.920 outgrowth of total information awareness
01:53:29.280 that I mentioned earlier paler was
01:53:31.040 literally created to replace that they
01:53:33.440 did it on purpose Palmer Lu's company
01:53:35.800 andril too is insane it's involved with
01:53:39.639 the Border stuff too they have this huge
01:53:42.360 surveillance autonomous dragut On the
01:53:44.360 Border andil setup it's obviously not
01:53:46.800 stopping people from coming in is it to
01:53:48.880 stop people from coming coming out
01:53:51.800 maybe I just both ways I just finished
01:53:56.000 writing a piece about uh the the
01:53:58.159 basically the peer-to-peer

01:53:59.679 Revolution uh in the late 90s with
01:54:02.880 Napster uh with Nella with e donkey 2000
01:54:06.760 which was Jed MB the mount goau Ripple
01:54:08.920 stellard guy um and you look at actually
01:54:12.000 there was a huge amount of involvement
01:54:13.840 of intelligence agencies in the founding
01:54:16.320 of Napster uh of of bitor you see that
01:54:20.520 the ISP usage the percentage goes from
01:54:23.239 being like well under you know 10% of
01:54:26.360 you know the internet usage being
01:54:27.840 peer-to-peer networks to being over 60%
01:54:30.960 by the time bit Tor had really done its
01:54:33.000 thing uh and you cannot really have a
01:54:36.320 surveillance State without being able
01:54:38.520 basically to offis data sending packet
01:54:42.719 sending from your devices to these
01:54:44.760 centralized servers where they're doing
01:54:46.880 this work so you actually even look at
01:54:49.159 the basically you know Napster was
01:54:51.199 arguably a s off to get us all to
01:54:53.760 connect our computers and make the
01:54:56.320 internet be this huge network of
01:54:58.199 peer-to-peer stuff with huge amounts of
01:54:59.960 data packet sending to set us up right
01:55:02.599 before 911 right before the Patriot Act
01:55:05.840 right before you know all the things
01:55:07.239 that were then later exposed basically
01:55:08.800 in Vault s and you can kind of see this
01:55:10.960 trend of you know I mean it's literally
01:55:13.719 Peter teal and and then these these same
01:55:16.159 people uh that were that were
01:55:18.040 infiltrating you know the peer peer
01:55:20.000 networks that basically allowed for the
01:55:22.040 observation of the data surveillance
01:55:24.280 Market that we now have uh it's very on
01:55:27.440 that no the big Trend with data after
01:55:29.480 911 like intelligence agencies you know
01:55:32.320 the the narrative right was like failure
01:55:34.320 of imagination and intelligence failure
01:55:37.920 about why 911 happened right and so the
01:55:41.239 solution that the intelligence agencies
01:55:43.880 had ready made to this excuse uh was
01:55:47.360 that all D all the data of the National
01:55:50.480 Security Community needs to be
01:55:52.280 warehoused in one Central spot and
01:55:55.159 shared yeah you had shared with me the
01:55:58.400 letter from Larry pagee who wrote A New
01:56:01.239 York Times offed like two months after

01:56:03.280 91 Larry Ellison sorry Larry Ellison of
01:56:06.480 Oracle which was a CIA project as well
01:56:09.360 project Oracle yeah and he had come out
01:56:12.239 and been like you know the way to avoid
01:56:14.199 911 the next time is to yeah exactly
01:56:16.719 what you just said sorry just wanted to
01:56:18.400 they want everyone's data data has been
01:56:20.159 a huge part of this play for a really
01:56:21.920 long time and now we're giving away more
01:56:24.199 of our data than ever and more intimate
01:56:26.520 parts of our data and now they have
01:56:28.119 tools that use that data that can do
01:56:30.560 awful things if we let them and it
01:56:33.960 doesn't mean we have to live without AI
01:56:36.400 or any of this stuff like if you want to
01:56:37.880 use it okay but we have to divest from
01:56:40.280 Big Tech AI because they are trying to
01:56:43.360 use AI to turn us into a like un giant
01:56:47.760 underclass of subhumans
01:56:50.280 who I mean this kisher Schmid book is so
01:56:53.199 crazy and I encourage everyone to read
01:56:55.119 it because they literally lay out that
01:56:57.000 it's going to create Neo feudalism they
01:56:58.920 don't use that term but basically they
01:57:01.480 say there will be two classes of people
01:57:03.800 there will be the people that program
01:57:05.199 and maintain and set the objective
01:57:07.560 functions of AI and then there will be
01:57:10.040 the people that AI acts upon who lose
01:57:12.560 the ability to understand what AI is
01:57:14.760 doing to
01:57:16.960 them yeah that's Neo feudalism but like
01:57:20.960 for obviously it's big Tech and everyone
01:57:24.040 else is essentially what that is and the
01:57:26.679 people who set The Objective function
01:57:28.280 I'm sure will be like existing oligarchs
01:57:30.480 and existing power Elites yeah once that
01:57:33.760 system's in place you're not going to
01:57:35.520 break and get into the the top tier like
01:57:39.199 that's over you know and you'll the
01:57:42.599 whole what they talk about is co you'll
01:57:44.360 be cognitively diminished AI will act on
01:57:47.760 you will manipulate you in ways you
01:57:49.520 don't understand and you won't be able
01:57:51.920 to tell what's real and what's not and
01:57:54.639 that AI uh well first of all AI
01:57:57.960 hallucinates like that's the term it
01:58:00.119 like will produce output that isn't even

01:58:01.840 real and doesn't exist and they argue in
01:58:04.360 this book that AI will push us into this
01:58:06.800 era of unseen realities and that only AI
01:58:10.719 can see and we should trust that those
01:58:12.480 are real because AI is super
01:58:15.159 smart yeah and
01:58:18.040 so this Matrix level [__] to an insane
01:58:21.480 degree it really truly is I had a good
01:58:24.679 conversation Alex fetky last month and
01:58:27.360 like the whole narrative around AI right
01:58:30.119 now particularly why they're trying to
01:58:31.239 create these regulatory modes is this
01:58:32.760 concept of AGI artificial general
01:58:36.040 intelligence it's yeah it's a complete
01:58:37.880 red herring to just funnel people into
01:58:40.119 these closed Source AI systems where you
01:58:42.320 can control the propaganda bit of a
01:58:44.239 white pill here it's good to see open
01:58:47.599 totally open source a bit of a white
01:58:50.119 pill yeah there is this here's the white
01:58:53.159 pill open source AI models are reaching
01:58:54.920 parody with open Ai and uh mid Journeys
01:58:58.800 in the world which is good yeah I mean
01:59:01.440 if you are against the world coin model
01:59:03.719 and you're using open Ai and like
01:59:06.480 pumping Altman's bags and making him
01:59:08.480 more powerful like please stop dude I
01:59:12.079 will I've been experimenting with it
01:59:14.199 just to like see how it works but the uh
01:59:16.639 that's what our strategy in 2024 were
01:59:18.920 trans iing all to open source
01:59:21.000 models yeah yeah I mean there's a reason
01:59:24.280 they've been so successful it's because
01:59:26.079 they've made us so dependent on
01:59:27.800 specifically big tech tech and it's very
01:59:30.920 hard to drop that like that especially
01:59:33.360 when you have like businesses to
01:59:34.679 consider that are like so entrenched
01:59:37.000 with that a lot of the time but if you
01:59:39.040 are a company that wants to stand for
01:59:41.000 freedom and specifically Financial
01:59:42.840 Freedom you must move away you must have
01:59:46.400 a plan to move away because I mean
01:59:48.599 what's happening I mean take Microsoft
01:59:50.159 as an example which basically is open AI
01:59:52.719 at this
01:59:53.719 point um they've basically said okay you
01:59:56.760 have a Windows system your data on there

01:59:59.440 is tied to your Microsoft account if you
02:00:01.360 lose access to your Microsoft account or
02:00:03.719 we block you from your Microsoft account
02:00:06.040 you lose all of your
02:00:07.679 data on your own computer and at the
02:00:11.079 same time you have no right to say no to
02:00:13.639 them uploading all of the data all of
02:00:16.159 your data on your computer to feed their
02:00:19.800 which presumably will include open AI so
02:00:22.639 your data is not even your data anymore
02:00:24.480 with Microsoft why are you using
02:00:26.239 Microsoft
02:00:27.480 products and and that's where that I
02:00:29.480 think the removal of you know it it
02:00:31.560 really the onus is on us to you know
02:00:34.520 stop feeding these things there was a uh
02:00:37.760 you know a 2006 paper uh by Assange
02:00:41.119 called conspiracy as governance that
02:00:42.840 kind of is basically the white paper for
02:00:45.320 Wikileaks and he talks about the need
02:00:47.599 for us as Citizens to increase the cost
02:00:50.280 of the conspiracy against us and I think
02:00:53.079 in regards to AI you know the way that
02:00:55.480 we do that is we stop feeding them the
02:00:58.320 data that they need to you know if we if
02:01:01.040 we feed them [__] data uh it gives
02:01:03.920 them more [__] to process more things to
02:01:06.000 parse the thing that AI really does for
02:01:08.040 them in the panopticon that we're in is
02:01:09.760 it helps them parse through all of the
02:01:12.079 surveyed data really really quickly so
02:01:14.400 if we are really like careful with what
02:01:16.599 data that we feed them you know AI is a
02:01:19.639 great tool for them for decreasing the
02:01:22.280 cost of their conspiracy of of gr of
02:01:24.719 General surveillance they don't need to
02:01:26.360 you know hire you know a thousand people
02:01:28.360 that parse through all of our chats they
02:01:30.079 can just have one thing search for oh
02:01:32.360 [__] these guys said Hamas sleeper cells
02:01:35.119 boom and then they you know now they're
02:01:37.079 looking at all their things they flag
02:01:38.560 them so you know it's really important
02:01:40.280 for us to not uh you know expose our
02:01:44.360 data by using and agreeing to these user
02:01:46.719 agreements where we let you know like
02:01:48.320 what wheny just said you know using
02:01:50.119 Microsoft products means all of your

02:01:51.679 data on your Microsoft product is theirs
02:01:54.040 and that feeds their AI without that
02:01:56.040 data this AI is completely useless so we
02:01:58.440 need to increase the cost of the
02:01:59.880 conspiracy against us uh very like
02:02:02.679 carefully and and uh and that that's
02:02:05.719 really how we do it is limiting our
02:02:08.040 exposure to their systems and then you
02:02:10.719 know hey maybe if we want to set up a
02:02:12.440 bunch of uh apis that feed a bunch of
02:02:14.800 [__] data into you know Sammy
02:02:17.079 alman's uh thing sure let's go do that
02:02:19.520 but that's not like something that
02:02:20.760 everybody can do that's not like a
02:02:22.520 practical thing for you know for like my
02:02:24.400 parents or a day-to-day you know user of
02:02:26.719 the internet but understanding that you
02:02:28.599 know you data is the most liquid
02:02:31.560 commodity in the world and there's huge
02:02:34.599 spect of markets for data there's huge
02:02:37.079 data Brokers that sell you know billions
02:02:39.880 of people's data uh for pennies on the
02:02:42.639 dollar to these companies that you know
02:02:45.599 there's so much stuff in data Brokers it
02:02:48.040 gets so crazy and I think Ai and data
02:02:50.639 and surveillance have a huge sort of uh
02:02:53.079 they're odd bed fellows uh and we have
02:02:55.599 to just be really careful about what we
02:02:57.480 feed into it and what we let out uh
02:03:00.400 incidentally because again convenience
02:03:02.520 is the easiest way to leak all of this
02:03:04.520 stuff it's you know you use Facebook I
02:03:07.000 mean that's what Facebook really was it
02:03:08.880 was like how do we get everybody to tag
02:03:10.800 their faces tag where they are say what
02:03:13.599 they're doing you know um I don't know I
02:03:17.639 I I I think it's uh it's exceptionally
02:03:20.800 important for us to understand that our
02:03:23.639 data is feeding these products and
02:03:26.079 make it worse for everyone else you know
02:03:28.440 it is sort of a it's a team sport uh
02:03:31.199 much like privacy on bitcoin right it's
02:03:33.599 like if you do good privacy tactics it
02:03:36.639 makes everyone's privacy better it's
02:03:38.679 kind of the same thing with how we deal
02:03:40.239 with AI and these learning language
02:03:42.239 models and these data harvesting
02:03:44.599 techniques it's like the better we are

02:03:46.639 the harder it is for everyone else to
02:03:48.280 triangular because that's how data
02:03:50.239 markets really work it's
02:03:52.159 triangulation yeah the um I'm very
02:03:55.639 bullish
02:03:56.679 on the open source models that really
02:03:59.559 get away especially when you add like
02:04:01.079 the lightning Network pay walls because
02:04:02.239 that's the big problem for people that's
02:04:03.520 what open AI does very easily it's like
02:04:06.360 you pay a monthly fee you get access you
02:04:08.440 just do this thing whereas if you were
02:04:10.920 to set up an open source model like
02:04:14.040 you'd have to run it you have to get
02:04:15.159 like a a cloud server or whatever Cloud
02:04:17.880 GPU host it and then use it host it
02:04:20.719 locally to some extent but where the
02:04:23.000 lightning Network comes in makes it very
02:04:24.559 easy for people to do all that hosting
02:04:26.800 you just pay lightning Network pay wall
02:04:29.320 um you don't have your identity attached
02:04:31.719 to that at all and again they're
02:04:34.119 reaching parody with the chat gbts of
02:04:36.559 the world which is
02:04:39.520 good
02:04:41.119 absolutely well I mean the most
02:04:43.320 important thing here is divest from Big
02:04:46.079 Tech specifically like the big four the
02:04:48.400 ones that that are contractors with the
02:04:50.639 National Security State and have
02:04:52.119 essentially fused with the National
02:04:53.679 Security State so like Amazon Google
02:04:55.920 Microsoft Oracle like all the big ones
02:04:58.040 Facebook like all the big ones that are
02:04:59.599 like obvious have like obvious
02:05:01.679 documentable intelligence connections
02:05:03.639 from their Beginnings to now you know
02:05:06.199 like those are the ones to avoid that we
02:05:07.880 should not definitely not be using and I
02:05:10.559 think also um something that needs to
02:05:12.360 happen is that like supporting that kind
02:05:15.239 of stuff and saying like oh we shouldn't
02:05:17.840 divest like don't be a martyr and don't
02:05:20.760 fight the system whether it's like for
02:05:22.520 Bitcoin or like big Tech or whatever
02:05:24.639 like that needs to become culturally
02:05:26.360 unpopular for people who actually care
02:05:28.440 about like individual freedom and

02:05:31.239 protecting it you know yeah like that
02:05:35.040 stuff should be called out for what it
02:05:36.880 is whether the the people saying it like
02:05:39.000 know it or not then give them the
02:05:40.639 opportunity to be educated about it you
02:05:43.079 know but if you know there's a lot of
02:05:45.920 infiltration going on right now to get
02:05:48.239 people to acquiesce to this kind of stuff
02:05:50.719 or saying it's inevitable or saying it
02:05:52.679 will be good for you or you little guy
02:05:55.520 will become part of the privileged
02:05:58.119 class yeah you know that's all fake and
02:06:01.400 that's not what's going to happen it's
02:06:03.520 just to get you to be complacent and not
02:06:05.480 to do anything about what they're doing
02:06:09.000 yeah so if you're if you're looking for
02:06:10.800 like an open AI chat gpt alternative a
02:06:13.800 bit winner actually just released a
02:06:15.480 company called unleashed. chat that uses
02:06:19.040 specific specifically open source models
02:06:22.400 so that you can avoid chatGPT that's
02:06:25.079 the thing like I think I think these
02:06:26.960 guys are going to lose because um the
02:06:29.079 open source models are beginning to
02:06:30.599 outpace them in terms of quality I I
02:06:33.559 definitely hope they lose but the other
02:06:36.280 thing here that's also highlighted in
02:06:37.920 this Kissinger Schmid book is like if
02:06:39.639 people become dependent on AI it doesn't
02:06:41.880 really matter if it's open source or not
02:06:43.599 people then become what they talk about
02:06:46.320 in their book cognitively diminished the
02:06:48.719 whole idea it doesn't even I mean it
02:06:51.079 existed before AI if you don't use it
02:06:53.400 you lose it like any type of skill right
02:06:56.119 so like most of us right were I don't
02:06:58.280 know in college 10 years ago like do you
02:07:00.280 remember everything you took then
02:07:02.000 specifically the stuff you haven't used
02:07:03.719 since like probably not like that is a
02:07:06.679 real thing that happens with the human
02:07:08.079 brain you know what I mean so like if
02:07:10.800 you become you know if you use chat GPT
02:07:13.320 for a few things and like certain cases
02:07:15.920 okay but like if you're using it for
02:07:17.440 everything to the point where like you
02:07:18.800 don't you've gone a year without
02:07:21.079 actually writing your own article and

02:07:22.440 you're like a journalist or something
02:07:24.079 and you're using chat gpt to generate it
02:07:25.719 all for you you're gonna go to try and
02:07:28.320 write without GPT and you're going to
02:07:29.760 find it really hard like that's what
02:07:31.480 Kissinger and Schmid are talking about
02:07:33.079 and that's what they want to happen and
02:07:35.679 and and not just in the case of chat GPT
02:07:37.440 in terms of like the algorithms like
02:07:40.320 dictating your preferences right things
02:07:43.199 like that you know or or dictating like
02:07:45.520 where you go and what you do like the
02:07:47.280 suggestion stuff like buy algorithms and
02:07:50.079 all of that like you won't even be able
02:07:51.719 to make basic decisions based on your
02:07:55.040 own preferences anymore like that's what
02:07:57.360 they're talking about so like all this
02:07:59.119 stuff with AI is a slippery slope
02:08:00.800 obviously open source is better than big
02:08:03.119 Tech but people also have to like engage
02:08:05.599 with this technology
02:08:07.159 responsibility uh responsibly um because
02:08:11.079 these guys are very
02:08:12.800 aware uh and we should be aware too that
02:08:15.920 it can have very negative impacts on
02:08:18.159 human cognition and we need our critical
02:08:21.199 thinking skills to get through this and
02:08:23.320 to build Alternatives so let's keep them
02:08:25.520 please you know very obvious but not that
02:08:29.679 nice you know I think it's very obvious
02:08:32.199 this has already happened I mean just
02:08:34.079 looking at what's happened in the last
02:08:35.880 six months of consuming content I mean
02:08:38.639 it's yeah this there's a homogeneous
02:08:41.639 blob of clickbait [__] that's just
02:08:44.559 clearly been made by AI it's on every
02:08:48.480 media platform everywhere I mean you
02:08:51.159 just see it uh and it's horrible and you
02:08:55.280 know I think there's an opportunity for
02:08:57.800 people to look for real content you know
02:09:01.040 look for people that are actually
02:09:02.280 writing stuff doesn't necessarily have
02:09:04.079 to be like long form or like the stuff
02:09:05.719 you do Whitney or whatever but like you
02:09:07.960 know there's there's a serious need
02:09:10.440 there's a huge vacuum um because there's
02:09:13.360 a big love affair going on right now
02:09:15.280 with like predictive generated content

02:09:17.760 uh and I think very obvious as a
02:09:19.520 consumer of content that it's really
02:09:21.760 messed up the the market for journalism
02:09:25.239 and for Content it's just become this
02:09:27.480 it's a huge problem honestly in
02:09:29.199 Independent Media because AI has already
02:09:31.719 like caused a lot of damage for
02:09:33.440 Independent Media even before chat GPT
02:09:35.440 was here because people that like grew a
02:09:38.000 platform and then instead of becoming
02:09:39.599 motivated about like getting the truth
02:09:41.800 out or like spreading the word about a
02:09:43.440 particular issue they become like a
02:09:45.199 slave to the metrics to The Click count
02:09:47.920 to the count and all of that stuff and
02:09:50.000 and playing the algorithms and SEO and
02:09:52.920 stuff to get to the top and so what what
02:09:55.920 happens then is everyone's trying to do
02:09:58.320 the same content not the same content
02:10:00.599 necessarily but trying to play the
02:10:02.880 algorithms game and plate the algorithm
02:10:05.559 to get to the top and so a lot that
02:10:08.760 creates a lot of like you know a
02:10:11.119 homogenizing effect among a lot of
02:10:13.079 Independent Media and in terms of like
02:10:14.960 titling and like clickbait and all of
02:10:16.840 that stuff like if it wasn't for the
02:10:19.000 algorithm and all of that that would not
02:10:20.920 have happened you know what I mean and I
02:10:22.719 think that's kind of harmed
02:10:25.079 journalism uh to be to be quite honest
02:10:28.440 um but yeah about SEO but I know other
02:10:32.199 people can't do
02:10:33.679 that well I'd be very interested we've I
02:10:37.079 mean I've been using this stuff in an
02:10:39.960 attempt to in a very particular way it's
02:10:41.920 okay a lot of a lot of people do you
02:10:44.159 know if you're trying to like run a News
02:10:45.639 website and you're one person and you
02:10:47.360 want to put out like I don't know five
02:10:48.880 or six stories a day like I get it you
02:10:52.079 know what I mean but like there's you
02:10:54.679 know situations where it's just people
02:10:57.360 being like this is so convenient I'm
02:10:59.079 going to use it what I'm talking about
02:11:00.480 is like I'm not saying like don't engage
02:11:02.520 with it at all I'm saying like use it
02:11:04.440 responsibly and be aware it can have

02:11:06.280 this impact on you this if you don't use
02:11:09.320 it you lose it stuff you don't want to
02:11:11.239 lose it because they want you to lose it
02:11:13.880 because then you're easy to control
02:11:15.239 because you like lose your your
02:11:17.400 cognitive fact
02:11:18.880 and that's what they're trying to H
02:11:20.400 people towards yeah like at bitco
02:11:22.719 magazine we write in the print mag like
02:11:25.119 AI free because we don't use any AI at
02:11:27.520 all that's like a choice that we made
02:11:29.159 deliberately but on do we use AI to
02:11:32.280 generate images for certain things that
02:11:34.440 we don't have images for but we don't
02:11:36.400 we're not like writing stuff you know
02:11:37.679 it's like there's there are lines that I
02:11:40.040 understand that you know for a media
02:11:41.320 company that when people make those
02:11:42.719 choices I totally understand but I also
02:11:44.760 there's a reason why the print mag
02:11:47.199 doesn't touch any of that stuff and
02:11:49.040 proudly demonstrates it puts it as a
02:11:51.559 thing on there that says we don't do
02:11:53.400 this because it's part of what actually
02:11:54.920 sets us apart and uh you know hopefully
02:11:57.559 will give us some lasting power right
02:12:00.159 yeah and I've been so the way I've been
02:12:01.760 experimenting with this like last three
02:12:03.480 or four weeks is I agree with everything
02:12:06.840 you just said like if you don't use it
02:12:08.040 you lose it and the hallucinations but I
02:12:10.480 found a tool that really so like what
02:12:13.239 I'm trying to do is curate like content
02:12:15.520 that I think is good that people should
02:12:16.760 like get access to and it's usually
02:12:19.199 audio and video content and those
02:12:21.360 content producers don't write articles
02:12:23.679 about it and so what I do is I take
02:12:26.119 their YouTube video or their podcast
02:12:29.040 then I put it through a
02:12:30.679 transcription uh service and then I
02:12:33.360 point right now chat gbt but I've recogn
02:12:36.400 I've honed in on an open source AI that
02:12:39.440 I'm going to use to do this going
02:12:41.320 forward as you point chat gbt at it and
02:12:43.679 you say all right write give it a prompt
02:12:46.119 like write me a summary of this
02:12:48.559 transcription of this audio file in the

02:12:50.520 form of an article um and it doesn't
02:12:53.320 hallucinate like you can only write
02:12:54.639 about that specific transcription so
02:12:56.119 we'll run this episode through it and it
02:12:58.159 will only be able to give us information
02:12:59.559 about what was said in that
02:13:01.639 transcription and I attribute the
02:13:05.079 original content creator put a link to
02:13:06.480 the original content um and then the
02:13:09.199 article is written by staff so it's
02:13:10.960 somewhat obvious that it's not like a
02:13:12.320 human writing it um right try to make it
02:13:15.760 like this is AI content but it's all
02:13:18.040 effort to curate what I deem to be high
02:13:20.520 signal content and then help those
02:13:23.199 original content creators like get
02:13:25.480 attribution like like sort of
02:13:27.440 weaponizing the SEO game giving them
02:13:29.040 back links so that their stuff begins to
02:13:31.639 Bubble Up and all
02:13:34.119 that and it's uh no it's weird because
02:13:36.800 it
02:13:37.920 is it's new we've been experimenting
02:13:41.079 with
02:13:41.719 if I think it's a value ad but I can see
02:13:45.320 like I haven't written in 3 weeks
02:13:46.480 because I've been trying to get the
02:13:47.400 process down for this I'm going to start
02:13:49.239 writing every day again but it's like H
02:13:51.760 it's like how do you fight back in this
02:13:53.719 world to try to get the good content out
02:13:56.159 there well I mean the thing is you know
02:13:57.920 everyone I'm like a voluntar like into
02:14:00.719 voluntari anism you know like just like
02:14:03.199 I don't want to tell anyone what to do
02:14:05.559 you know but people should think about
02:14:07.239 the stuff and be very aware of the risks
02:14:09.239 and make informed decisions and I think
02:14:13.040 prioritize keeping their critical
02:14:15.000 thinking ability you know so like
02:14:18.599 definitely don't threaten that you know
02:14:21.719 and do as much as you can to divest from
02:14:24.520 Big Tech I don't know I mean I'm not
02:14:26.840 going to tell you what to do Mary if you
02:14:28.280 think it's useful in a value
02:14:30.440 ad very cool you know but um people need
02:14:35.679 to be aware of the risk so a lot of
02:14:37.599 stuff like when I focus on AI

02:14:39.079 specifically stuff like where
02:14:40.159 hallucination AI hallucinations come
02:14:42.119 into play I mean they're trying to put
02:14:43.760 AI in charge of like major decisions not
02:14:45.679 just like who lives and who dies uh but
02:14:48.320 stuff like facial recognition and like
02:14:50.320 in the UK there was like sort of a mini
02:14:52.719 Scandal because like the Met police were
02:14:54.840 using like these live uh facial
02:14:57.320 recognition algorithms and they were
02:14:59.000 like super
02:15:00.159 inaccurate um and like flagging people
02:15:02.440 to like pull out of crowds and stuff but
02:15:04.199 it was like insanely inaccurate and also
02:15:06.800 there's been a long problem recognized
02:15:08.400 for a long time that a lot of these AI
02:15:10.360 um facial recognition uh algorithms like
02:15:13.280 used by law enforcement are super like
02:15:14.960 racially biased for example right um
02:15:18.159 among other issues and they like in the
02:15:20.679 UK like just didn't want to change it
02:15:22.719 they're like yeah we know it's
02:15:23.679 inaccurate so what I mean what is that
02:15:26.480 really about then well um I forget his
02:15:29.920 first name but there's this famous like
02:15:31.559 philosopher folkal uh who you know wrote
02:15:34.559 about like you know control and the
02:15:36.599 panopticon and all of this stuff he's
02:15:38.400 like a big inspiration for the paler
02:15:40.639 guys like when the New York Times and
02:15:42.360 this big spread about Palante or they
02:15:43.960 like posed under fal's portrait and
02:15:45.960 stuff the idea of like his panopticon is
02:15:48.880 like you know just the the feeling that
02:15:52.400 you're being watched by the state will
02:15:54.159 make you behave you know it's not about
02:15:57.119 like the AI being accurate necessarily
02:16:00.639 it's about like everyone knowing they're
02:16:01.880 being watched and they could be plugged
02:16:03.040 out of that crowd at a moment's notice
02:16:04.400 and to get in
02:16:05.599 line you know that's the kind of stuff
02:16:07.960 they're trying to create so like in my
02:16:11.960 opinion that AI cannot be fed and cannot
02:16:14.679 be supported and it's the big tech
02:16:16.280 companies making that AI starve them of
02:16:18.840 your data or feed them garbage data if
02:16:20.880 you have the capability to do that you

02:16:23.520 know like those should be opposed
02:16:27.000 100% you know and the problem is here
02:16:29.280 with like open AI you know that's
02:16:31.239 Microsoft Microsoft is so in bed with
02:16:33.359 all of this stuff dude I mean come on
02:16:35.040 it's Bill Gates's company it was super
02:16:37.359 compromised by epine in the 90s no one
02:16:39.240 wants to talk about that that's why they
02:16:40.840 lie and say that Bill Gates and Epstein
02:16:42.959 didn't meet until 2011 when he was no
02:16:44.840 longer like running stuff at Microsoft
02:16:47.718 even though there's news articles in
02:16:49.760 mainstream media saying in 2001 that
02:16:52.599 Epstein made a bunch of M his money in
02:16:54.200 the 90s from Bill Gates oh but they
02:16:56.398 didn't meet 10 until 10 years later it
02:16:58.359 makes no sense right so like their
02:17:00.080 covering for
02:17:01.240 Microsoft has been so compromised and
02:17:03.478 tied up with intelligence for years and
02:17:05.040 years and years not good for anybody and
02:17:07.920 they're basically uh trying to get their
02:17:10.558 new election software election guard in
02:17:13.718 installed all over the US they're
02:17:15.599 responsible for News Guard part of this
02:17:17.359 crazy censorship industrial complex
02:17:19.558 that's just totally insane and all this
02:17:21.679 other stuff um like they're a lot more
02:17:25.558 than just a big tech company they're
02:17:27.638 involved in a lot of very bad things and
02:17:29.718 they're a dominant market player I mean
02:17:32.160 Windows is used by like not everyone but
02:17:35.519 like a dominant amount of the world
02:17:38.718 right I mean same with Google um but we
02:17:41.359 have to break into that I mean we have
02:17:43.080 to make the choice to not support that
02:17:45.240 like even if you're just the one person
02:17:47.000 or you feel like you're one person doing
02:17:48.799 that like it's it's an important
02:17:51.040 decision to make and hopefully other
02:17:52.679 people will make that decision but like
02:17:54.920 I don't know I look at at sort of like a
02:17:56.439 karmic angle like I don't want to feed
02:17:58.318 that I know it's bad and if I continue
02:18:00.799 to feed it just because of convenience
02:18:02.638 like that's not going to be good for me
02:18:04.519 long term I mean that's how I feel about
02:18:06.840 it personally I mean obviously people

02:18:09.318 may not look at it that same way yeah
02:18:12.718 but again I mean those same people that
02:18:14.519 end up relying on this stuff and big
02:18:16.160 Tech stuff big tech product are being
02:18:18.160 designed to her you into this world is
02:18:19.959 outlined by Kissinger and
02:18:22.558 Schmid yeah I completely stop using it
02:18:26.318 you know um and they're putting the
02:18:28.318 stuff in charge of you know who goes to
02:18:30.160 prison who stays free who lives and who
02:18:33.519 dies uh who gets visited by the you know
02:18:37.439 vaccine people and who doesn't I mean
02:18:39.558 whatever I mean it it's it's all there
02:18:42.240 like the biocurity agenda is still
02:18:44.120 definitely like a thing going on even if
02:18:46.318 it's like kind of on the back Bur now I
02:18:48.160 mean there's all this crazy stuff
02:18:49.519 happening and they need AI for all of it
02:18:52.359 just in terms of like scalability you
02:18:54.398 know they want to put like an insane
02:18:55.760 amount of people under their thumb and
02:18:58.160 they're a small group of people like
02:18:59.840 we've talked about and they're losing
02:19:02.478 they're hemorrhaging trust and have been
02:19:04.519 for years yeah
02:19:07.558 so they need it how people need to
02:19:10.879 really think about how to fight against
02:19:12.959 this and understand what the risks are
02:19:15.040 and it it starts off with individual and
02:19:17.080 personal responsibility and it starts
02:19:19.280 off with building Alternatives and being
02:19:22.000 local and unplugging occasionally and
02:19:23.959 doing real stuff completely agree and
02:19:27.439 totally on that I have to run the
02:19:29.439 restroom so badly I'm so sorry I gotta
02:19:32.160 run I'll be right back all right now
02:19:35.240 that's the uh this whole open AI thing
02:19:38.040 I've been using it for like three weeks
02:19:39.638 and I'm just like all right can I do
02:19:41.280 like a minimal viable product as this
02:19:42.840 work and does seem to work but I've
02:19:45.478 again identified and I've said this
02:19:47.160 public too that's our goal in 2024 is to
02:19:50.240 go completely open source do it in a
02:19:52.840 very narrow fashion trying to highlight
02:19:56.120 other people's content that is signal to
02:19:58.000 get it to people um well like you know I
02:20:00.760 used to work for like a news company

02:20:02.920 that used Google Docs but then
02:20:04.960 complained about Google censoring them
02:20:08.120 it's like why are you still using Google
02:20:10.720 Docs well because Google Business Suite
02:20:13.000 is convenient we've been using it for
02:20:14.600 it's great blah blah blah blah I
02:20:16.439 don't know I mean there's Alterna ative
02:20:17.680 to Google Docs there's like crit pad and
02:20:19.600 like other things like that out there
02:20:21.200 that like value privacy and aren't like
02:20:23.880 training their generative AI off of like
02:20:26.200 studying how you write in Google Docs
02:20:29.840 yeah you know so like people need to
02:20:32.080 make this decision because if you're
02:20:34.040 feeding AI it's going to be weaponized
02:20:36.200 against you they're already weaponizing
02:20:38.000 it against you do you want it to know
02:20:40.399 exactly everything like about you and
02:20:43.000 how you think and how you write and like
02:20:44.960 all of this stuff I think that's a very
02:20:46.600 bad idea
02:20:48.120 yeah no I completely agree that's why I
02:20:49.640 don't feed at any of that stuff I'm just
02:20:50.880 like all right yeah yeah article um a
02:20:56.160 it's fascinating because it is weird
02:20:57.399 we're at this inflection
02:20:59.240 point where things are changing so fast
02:21:02.040 on the financial side on the teex yeah I
02:21:04.399 think it's going to keep accelerating
02:21:05.960 too I mean especially when things get
02:21:07.560 really crazy I mean the internet may go
02:21:09.319 off and I mean as soon as they're like
02:21:11.399 oh you need a digital ID to get online
02:21:13.040 like I'm not going to be online anymore
02:21:14.800 like I'm not doing that like this is the
02:21:16.479 time for people to like decide what
02:21:18.479 their red lines are and like how they're
02:21:21.920 going to set up things and set up their
02:21:24.399 lives to avoid having to redge on those
02:21:27.120 red lines yeah you know like I am never
02:21:30.800 going to do digital ID I'm never going
02:21:32.520 to do cbdc or synthetic cbdc or any of
02:21:36.399 this [__] that we've been talking about
02:21:38.160 I'm not going to do it right so how do I
02:21:40.319 set up my life so I don't have to engage
02:21:42.120 with those systems when they're launched
02:21:43.560 and made like
02:21:45.920 involuntary you know now I mean that's

02:21:48.800 this is the time to think about all that
02:21:50.399 stuff this is why I think we need like
02:21:52.520 another Occupy Wall Street I mean I
02:21:54.760 think Occupy Wall Street was completely
02:21:56.240 cucked and missed the point but like
02:21:57.560 something like that where people hit the
02:21:58.840 streets and for like actually well I
02:22:01.280 think they want people to hit the
02:22:02.600 streets I think it's all about building
02:22:04.960 stuff they hate that they want you to
02:22:07.359 use their tools they don't want you to
02:22:09.479 make your own we have to make our own
02:22:12.560 you know and it's not just like tools
02:22:14.040 like Tech tools it's like just building
02:22:17.800 Community Building or building a
02:22:19.880 homestead or like just building anything
02:22:22.240 they want you on your butt glued to a
02:22:24.160 screen uh and uh doing nothing trust the
02:22:27.600 plan whatever and and using all these
02:22:31.000 technologies that are super convenient
02:22:32.560 and being fed to us all the time instead
02:22:34.640 of going out and doing what humans do
02:22:36.439 which is to create and build and if we
02:22:39.160 stop creating and building same deal you
02:22:41.000 use it you lose it people Humanity will
02:22:42.880 lose the ability to even remember how to
02:22:45.479 create and build you know I mean imagine
02:22:48.640 like kids born like 30 years from now if
02:22:51.560 these guys win and they're just going to
02:22:52.960 be like bombarded with like some like
02:22:54.840 tick talk [__] from the time they're
02:22:56.600 like born on their brain isn't going to
02:22:59.160 know how to create anything they're just
02:23:00.560 going to be used to being bombarded
02:23:02.160 constantly by like all this generated
02:23:04.240 content like they're not going to be
02:23:06.080 like humans are now they're not going to
02:23:07.880 know how to build and create anything
02:23:09.760 this is like an existential thing like
02:23:11.520 what are humans what are humans and what
02:23:13.800 did they what is humanity I mean they're
02:23:16.880 try to answer those questions for us and
02:23:19.000 lead us to an answer that is not what
02:23:21.160 humans are humans are creative beings
02:23:23.640 and we build things you know and they've
02:23:26.160 hijacked our society and are trying to
02:23:28.800 build their thing to control everyone
02:23:31.920 and we have if we don't want to live in

02:23:34.200 that system we have to build something
02:23:36.080 else and they want to create it so that
02:23:38.640 only this upper privileged class very
02:23:42.279 small class will be capable of building
02:23:45.840 and everyone else will lose that ability
02:23:47.640 and will be a giant underclass that they
02:23:49.160 can do whatever they want to that's not
02:23:51.520 how this is supposed to be yeah and so
02:23:54.600 we have to not give away those abilities
02:23:58.399 to these guys we have to do stuff it's
02:24:03.200 really that simple and you know I know
02:24:05.600 people get like blackpilled by this
02:24:06.960 stuff all the time but like building
02:24:08.840 stuff is fun creating stuff is fun you
02:24:12.600 know I mean it's very it the the way you
02:24:15.279 get blackpilled about this stuff is
02:24:17.160 doing exactly what they want to do you
02:24:19.319 want you to do which is get depressed
02:24:20.680 and get demoralized and stay on your
02:24:22.240 screen and sit on your ass all day and
02:24:24.200 be
02:24:25.560 miserable and that's them winning that's
02:24:28.640 them
02:24:29.319 winning and I would say it's not just
02:24:31.520 building stuff it's building sustainable
02:24:35.000 stuff which I know is a naughty word and
02:24:36.720 it's been totally co-opted by you know
02:24:39.080 terrible people but it's it's it's
02:24:41.520 building sustainable architecture with
02:24:44.640 incentive structures that feed it right
02:24:47.040 right it's not just about uh creating
02:24:49.760 you know little our separate wall
02:24:51.640 Gardens that once the uh people that
02:24:54.560 created it lose interest or pass on or
02:24:57.240 or whatever it falls apart it's like you
02:24:59.000 need to create alternative communities
02:25:01.359 and structures uh that have built in
02:25:04.240 game theoretical incentive structures
02:25:06.120 that will perpetuate it long past you
02:25:08.760 know the the creators being around you
02:25:11.680 know I mean that's what Bitcoin is right
02:25:15.000 uh it's an incentive structure anything
02:25:17.520 else that you know you could argue
02:25:20.080 trigger some of this altruistic stuff to
02:25:22.000 work for the benefit of the network but
02:25:23.520 really it's a it's a it's a selfish
02:25:25.720 incentive structure that allows you to
02:25:28.680 you know to to buy back your time and be

02:25:31.520 able to feed into it and I think we need
02:25:33.439 to kind of learn to Build architecture
02:25:37.040 that increase the cost of the conspiracy
02:25:39.399 of against you know the human race by
02:25:42.760 these people uh and then also creates
02:25:45.200 like a sustainable alternative archit
02:25:46.840 Ure that uh you know promotes creativity
02:25:50.279 and promotes having fun building stuff
02:25:52.640 and and all these things you know it's
02:25:54.399 like it's not just about going out and
02:25:56.040 building it's like well how do we build
02:25:57.720 stuff that's going to last that can
02:26:00.080 survive the internet going down that can
02:26:02.040 survive the coming onslaught of scops
02:26:04.520 that are here yeah and it's not like
02:26:06.760 even like everyone has to get out and
02:26:08.560 make all the things you know just I mean
02:26:11.399 some people have to I mean it's not like
02:26:13.880 we have to convince everyone on the
02:26:15.439 planet to stand against them us like it
02:26:17.640 it doesn't take everybody it just takes
02:26:20.200 enough you know and that's why it's like
02:26:24.120 a very small minority of people to
02:26:25.880 really affect this type of change it's
02:26:28.880 big changes always comes Downstream from
02:26:31.120 a small majority a small minority of
02:26:33.040 people I mean it's always that there the
02:26:35.120 Paro effic you know effect basically is
02:26:37.680 you know the 20% affecting the 80% uh
02:26:40.439 it's always a small group of people and
02:26:42.560 you see you know you know like again not
02:26:44.920 to mention Assange again but it's like
02:26:46.399 you get one person that kind of stood up
02:26:48.080 and built a a sort of system and now you
02:26:50.960 have all these you know acolytes that
02:26:53.960 are everywhere around the world that see
02:26:55.680 what he did and and now can build
02:26:57.359 alternative architecture that can maybe
02:26:59.479 build Wikileaks better than what
02:27:00.880 Wikileaks was and can actually sustain
02:27:02.800 the seating of these things and keep
02:27:04.399 these things going and by standing up
02:27:06.359 once you know you create hopefully five
02:27:08.840 people that see you stand up and then
02:27:10.520 that that that sort of trickles that
02:27:12.359 trickles away because people can really
02:27:14.120 tell there's there's a there's a bank
02:27:16.040 run on trust you know and and people can

02:27:19.479 really see when uh things are are really
02:27:22.600 fake and when things are true it
02:27:24.399 resonates like crazy um you know I think
02:27:27.399 that's why you guys get like such good
02:27:29.000 numbers and stuff of the work that you
02:27:30.560 guys do because it's like actually real
02:27:32.760 in a world of [__] [__] right so more
02:27:36.200 of that more of of that encouragement
02:27:38.800 from via doing uh not just talking about
02:27:41.640 it but the actual actions right we need
02:27:43.399 to really like internalize and
02:27:45.760 externalize
02:27:47.200 all the stuff that we talk about and and
02:27:49.319 actually put it in you know the
02:27:50.479 revolution is a very inward small local
02:27:53.080 thing it's not this huge massive thing
02:27:55.439 it's yes we can use the internet to
02:27:57.080 teach people the skills but it's like
02:27:59.200 learn to 3D print learn to hold Bitcoin
02:28:01.800 learn to grow food learn to do all this
02:28:04.279 stuff and then go do it and [__] off and
02:28:06.319 throw your phones in the river and like
02:28:08.160 stop feeding all this [__] right it's
02:28:10.479 like the revolution happens when that
02:28:12.200 happens right now it's important that we
02:28:14.359 teach and that those skills and that
02:28:17.279 Tech is disseminated but once it's
02:28:19.439 disseminated use the existing internet
02:28:21.479 to learn that stuff why it's still here
02:28:23.920 right you know because it won't that
02:28:25.720 kind of info and knowledge they will
02:28:27.720 take off when they bring it back it's
02:28:30.240 not going to have the same content it
02:28:31.720 has now when it comes back I guarantee
02:28:33.399 it no yeah we need a offline library of
02:28:38.279 AD start storing stuff offline on hard
02:28:40.399 drives that you will want or skills you
02:28:43.080 want to learn eBooks about it video rips
02:28:45.840 about it
02:28:47.240 whatever start storing that stuff you
02:28:51.760 know the Cubans exist and they've been
02:28:54.000 running these like USB packet data
02:28:56.880 packets for a while they're like in Peru
02:28:59.319 too
02:29:00.439 yeah and like all
02:29:02.840 over they're pretty like ingenious like
02:29:06.080 I don't know I mean I know like Global s
02:29:08.760 like a lot of these banking the unbanked

02:29:10.240 guys like have a I I think have a very
02:29:12.399 like negative view about like people in
02:29:15.600 the global South but as someone who like
02:29:17.399 lives in the global South people are
02:29:18.920 like very resourceful and creative here
02:29:21.160 and like do a lot of stuff with very
02:29:22.960 little compared to the US and have a lot
02:29:25.680 of skills that people in the US have
02:29:27.600 lost in terms of like you um if you
02:29:31.840 don't use it you lose it kind of stuff
02:29:34.319 like I mean if you think about like in
02:29:35.760 the US like okay so my great grandma
02:29:39.040 knew how to knit but I had to learn how
02:29:40.680 to knit from YouTube my grandma and mom
02:29:42.840 never learned my grandma uh worked and
02:29:47.000 didn't cook and made like TV dinners my
02:29:49.560 mom did the same I had to learn how to
02:29:51.160 cook myself like where I live in uh you
02:29:55.680 know in in Chile like people have a lot
02:29:59.240 of skills that people in the US have
02:30:01.040 kind of it's just been generationally
02:30:02.720 like phased out because people like just
02:30:05.000 don't know how to produce their own
02:30:06.720 stuff anymore or like stuff they need
02:30:08.920 anymore I've lived in California for
02:30:11.319 like 12 years and it's like these people
02:30:13.680 don't [__] know how to do anything
02:30:16.200 it's like Absolut they go from middle
02:30:19.800 school to high school to college to
02:30:21.800 Google campus and they walk in packs of
02:30:24.960 30 people they all have their backpacks
02:30:26.960 on they get every meal cooked for them
02:30:30.120 they deliver their uh everything that
02:30:32.960 they buy is delivered they get their
02:30:35.040 laundry done by somebody I mean it's
02:30:37.439 like it's I mean I worked in service for
02:30:40.040 this whole time and I served all these
02:30:41.520 people and it's like the things that I I
02:30:43.920 would go see I would watch Tinder dates
02:30:45.960 happen and see people meet each other
02:30:47.520 and talk about you know and it's just I
02:30:49.720 I just saw like creatures of the
02:30:51.560 algorithm and and complete loss of of
02:30:54.160 all of these skills that when he's
02:30:55.520 talking about just like everywhere you
02:30:57.600 know and I know it's fun to [__] on
02:30:59.359 California it's so easy but it's like it
02:31:01.120 really is like it's it's scary the uh

02:31:04.680 the
02:31:06.240 atrophy that really is so fight against
02:31:08.640 the atrophy and fight against the apathy
02:31:11.359 100% that needs to happen um on that
02:31:14.319 note I probably have to go uh some kid
02:31:17.200 stuff here in a second um but I got like
02:31:20.840 five five minutes if you want to sort of
02:31:24.840 like wrap it up if that's cool or at
02:31:27.960 least I can pop out I mean we've been on
02:31:31.120 for two and a half
02:31:32.319 hours yeah I think it's been great
02:31:34.720 though covered load of stuff very cool
02:31:38.399 it's been
02:31:40.319 awesome and before we wrap up I want to
02:31:42.720 give a shout out to the war mode guys
02:31:45.000 guys billion B to run the war mode
02:31:47.680 podcast for letting me use their Studio
02:31:49.479 Philly for the holidays really good
02:31:52.120 podcast you go check it out Whitney I
02:31:54.319 think uh it'd they'd be good uh good
02:31:58.359 show to go on as well I think they're
02:32:00.200 all right right on yeah that would be
02:32:03.399 [__] hilarious I would love that I'd
02:32:05.439 watch
02:32:06.200 that I know you're morb um fan but it's
02:32:10.240 uh yeah I mean I'm a huge comedy fan uh
02:32:14.359 and uh yeah I think I saw they were on
02:32:17.240 an early M mssp like a really long time
02:32:20.160 ago um and uh yeah just catch them on
02:32:23.880 that they're pretty funny yeah I grew up
02:32:26.439 in New England I know a lot of Philly
02:32:28.040 people um I used to play a lot of shows
02:32:30.680 I was in a band and used to play a lot
02:32:32.040 in like New York and Philly and western
02:32:34.240 Mass and all that so I have a pretty big
02:32:36.240 Philly crew so I know some of them guys
02:32:39.960 hell yeah Philly's uh Philly's all
02:32:44.640 right for I was born erased but uh yeah
02:32:48.840 we covered a lot uh stable coins
02:32:53.200 are going to be cbdcs don't use the
02:32:55.479 stable coins protect Bitcoin because
02:32:58.920 it's uh they're trying to co-opt it
02:33:00.800 right now it's it's under co-opt attack
02:33:04.160 definitely the co-opt attack is
02:33:07.520 here don't let the sailors of the world
02:33:09.760 be like just let it happen don't fight
02:33:11.240 back don't be a martyr that's the thing
02:33:13.520 that's like B again like bad framing

02:33:15.160 it's like the framing isn't like like
02:33:16.560 you go along with it or you're a martyr
02:33:18.240 there's like a whole another third
02:33:21.040 option you win um you got to have that
02:33:24.680 Winner's mentality we're going to win
02:33:27.359 it's not a cocky it's not a cocky
02:33:29.680 assertion to win you have to believe
02:33:31.680 that you can win it's a confidence
02:33:33.960 Builder we can do this no but we will
02:33:36.960 win because literally these people are
02:33:38.680 insane they're
02:33:41.760 insane and they're like actually idiots
02:33:45.200 the problem is like every everyone else
02:33:46.960 is like too distracted and too
02:33:48.279 complacent and letting this cognitive
02:33:50.880 diminishment thing take place and
02:33:53.479 letting it happen to
02:33:55.240 them yeah if there is a change there
02:33:57.600 it's like they have major problems they
02:34:01.080 have major problems I mean think of the
02:34:03.319 scops they have to throw at us now I
02:34:05.800 mean did you see that thing with like a
02:34:07.479 couple months ago like the whole alien
02:34:09.600 thing and they have like these like
02:34:11.160 Stone things in Mexican Congress being I
02:34:13.640 mean that literally look like ET from
02:34:15.800 the movie and like all the stuff and
02:34:18.000 like it was like paper Mach I mean like
02:34:21.640 stop dude I mean these are the people
02:34:24.120 that are taking over everything and
02:34:25.560 we're letting them do it it just doesn't
02:34:27.720 make it no and then like the guy that
02:34:30.399 invented cbdcs is like a failed reggae
02:34:33.000 artist uh
02:34:34.920 like in co-founds fluent Finance make it
02:34:38.640 stop make it stop they're sending their
02:34:41.680 best and their best are are not that
02:34:43.359 good no they're not have you seen Tucker
02:34:46.160 going on the podcast cir he's like I've
02:34:47.960 got the alien information I don't even
02:34:49.680 think they're aliens I think they're
02:34:50.760 like demonic beings he's like being very
02:34:52.600 vague about it like they've been with us
02:34:54.160 forever the Vatican knows the government
02:34:56.160 knows oh my God no I I have I have not
02:35:00.319 uh followed Tucker whose father was in
02:35:02.200 charge of us propaganda operations and
02:35:04.720 who went to visit Nicaragua during Iran

02:35:06.680 Contra Contra for Contra propaganda
02:35:08.800 operations and uh you know has had a
02:35:12.120 very interesting career trajectory I'll
02:35:14.120 just leave it at that um be very careful
02:35:17.840 about Peter tal Rumble
02:35:20.600 right he just joined Rumble no well yeah
02:35:24.960 a lot of people are at
02:35:26.920 Rumble um it's
02:35:29.359 true but again you know I think there is
02:35:32.000 a big effort to co-opt just like you
02:35:34.120 know co-opting Bitcoin big effort to
02:35:36.040 co-opt Alternative media um and a big
02:35:38.920 part of that is people offering money to
02:35:40.880 people and alternative media and the
02:35:43.680 Peter teal circuit
02:35:46.560 thee uh definitely does that and they do
02:35:49.640 it to a significant degree and they
02:35:51.479 publicly posture as being libertarian
02:35:53.960 Peter theel uh goes uh to bitcoin
02:35:57.160 conferences and calls himself a Bitcoin
02:35:58.880 maximalist and then later he goes on
02:36:00.760 stage with the then CIA director and
02:36:02.560 says it's a financial weapon from China
02:36:04.680 to destroy the US dollar and uh US
02:36:07.880 military power okay um that was within
02:36:10.960 like a three month SP it was very rapid
02:36:14.479 yes so um again and uh don't just buy
02:36:17.840 what these people say watch what they do
02:36:19.960 Peter theal if he's a Libertarian
02:36:22.240 literally gave the worst part of the
02:36:25.439 state the most powerful tool to
02:36:28.439 eliminate individual Freedom ever in
02:36:30.880 paler what kind of libertarian does
02:36:34.680 that yeah but he sold it for dollars so
02:36:38.520 he's just a capitalist dude you know all
02:36:41.880 right that empowers the state along the
02:36:44.800 way right
02:36:47.520 liian now he's funding their drones with
02:36:50.560 andreil
02:36:52.520 yeah all right I know we all got to go
02:36:56.120 Mark Whitney number one thank you for
02:36:58.279 coming on thank you for writing the
02:37:00.000 piece if you guys haven't read it we'll
02:37:01.600 link to it in the show notes go read it
02:37:03.560 the plan to roll out the stable coins in
02:37:05.720 the cbdc Who's involved yeah if you want
02:37:08.399 to know how the cbdc is going to be in
02:37:10.040 the US this is the piece to read for

02:37:13.439 sure hopefully more people will build
02:37:15.600 off of this because there's a lot
02:37:17.040 happening in this deposit token stable
02:37:19.040 coin space uh and it needs more coverage
02:37:22.160 and more light shown on it uh because as
02:37:25.160 thing stands now there's going to be
02:37:26.760 this uh dumb thing basically like this
02:37:29.920 false victory scop of uh oh yeah no cbdc
02:37:33.760 for the us we believe in Financial
02:37:35.399 Freedom all is well here uh but the same
02:37:38.200 programmability surveill ability will be
02:37:40.359 in the synthetic cbdc it's not a real
02:37:43.800 Victory um so people need to be aware of
02:37:46.920 what they actually plan to do you know
02:37:49.520 uh and it's very clear they've made it
02:37:51.040 very clear just no one's paying
02:37:52.279 attention so I would really encourage
02:37:54.560 other content creators watching to start
02:37:57.240 looking at this very seriously and start
02:37:59.200 talking about it a lot more because
02:38:00.760 thinking that it's just the bis is is
02:38:03.439 very mistaken it's not just the bis and
02:38:05.880 the US has very different
02:38:08.080 plans totally nice little summation to
02:38:11.800 catch you up I wrote a book called the
02:38:13.760 Bitcoin dollar came out of Bitcoin
02:38:15.840 magazine last year uh or rather this
02:38:18.040 year I guess it's not 2024 yet and uh
02:38:20.760 it's a nice little summation of the
02:38:22.080 history of interest rates dollar system
02:38:24.160 treasuries how they work and how they
02:38:26.920 are trying to dollarize bitcoin so you
02:38:30.120 know it's kind of a broad stroke look at
02:38:32.040 the mechanisms whereas of course you
02:38:34.279 know this piece uh with wiy is much more
02:38:36.880 like the specifics of like hey this guy
02:38:39.120 this person this reggae artist this
02:38:41.720 spook whatever um check Che out
02:38:46.680 if you want a little Speed Run uh on on
02:38:49.399 how this is happening as well yeah we're
02:38:52.520 going to win and still that confidence
02:38:55.160 in yourself even if you're not a content
02:38:57.120 creator speak out against this if you
02:38:58.640 are a content creator you should
02:39:00.359 definitely speak out against this like
02:39:02.000 this is an existential threat to the
02:39:05.880 future of freedom for all of humanity
02:39:08.560 that probably out over the rest of this

02:39:11.200 decade so the the time is nigh it is

02:39:15.439 time

02:39:16.439 get on this time to think about this

02:39:17.880 stuff and start doing stuff about it

02:39:21.200 yeah all right we'll end it there peace

02:39:23.319 and love

02:39:33.439 freaks
